Standard 1 Learning to read is one of life's most important skills. Becoming an accomplished reader greatly enhances a person's chances for success in school, in work, and in leisure activities. Success in any endeavor requires insight, effort, and practice. This series, *Reading Simplified*, provides an opportunity for students to satisfy those requirements. Insight comes with the understanding of steps and structure. The structure of reading is broken down into its many steps or skills: letter sound, recognition, kinesthetic discrimination, phonics, word structure, vocabulary, comprehension, oral reading, study skills, and content area reading. Effort usually comes from within, but students' efforts are sparked and sustained by the variety of motivating activities found in each book. Practice is at the heart of these books. Proper sequencing and progressive recapping of skills and approaches lead students toward reading mastery.

**Educational Trends Exposed** David Armstrong, Gill Armstrong, 2021-12-30 *Educational Trends Exposed* explains and critically reviews eighteen of the most prevalent trends sweeping schools, colleges, and universities over the last decade and beyond. Amid the buzz from news outlets, websites, and social media peddling this works, approaches, and quick fix solutions, this book provides educators with a practical tool to help answer important questions such as: what does this trend actually involve? Is it worth the investment of time and resources? Does it work? What does research say? Do the claimed benefits to students outweigh any downsides? In this timely book, David Armstrong and Gill Armstrong cast a critical expert eye over these trends, referencing the latest research and offering a framework for considering educational trends, empowering readers as informed critical consumers. They argue that trends disclose deeper truths about the state and direction of contemporary public education in Australia, England, and the US, and provide original thought provoking analysis. This book demonstrates that a greater understanding of trends can teach some important lessons, including how parents, teachers, and educational decisions makers can agitate and collaborate for a modernised and more socially equitable education system. *Educational Trends Exposed* is essential reading for pre and in service teachers and all educational decision makers who are faced with a choice of which trend, if any, to follow.

**Feminist Posthumanisms, New Materialisms and Education** Jessica Ringrose, Katie Warfield, Shiva Zarabadi, 2020-04-28 This edited collection is a careful assemblage of papers that have contributed to the maturing field within education studies that works with the feminist implications of the theories and methodologies of posthumanism and new materialism, what we have also called elsewhere PhEmaterialism. The generative questions for this collection are: what if we locate education in doing and becoming rather than being? And how does associating education with matter, multiplicity, and relationality change how we think about agency, ontology, and epistemology? This collection foregrounds cutting edge educational research that works to trouble the binaries between theory and methodology. It demonstrates new forms of feminist ethics and response ability in research practices and offers some coherence to this new area of research. This volume will provide a vital reference text for educational researchers and scholars interested in this burgeoning area of theoretically informed methodology and methodologically informed theory. The chapters in this book were originally published as articles.
