Illustrated Guide to Home Forensic Science Experiments Robert Bruce Thompson, Barbara Fritchman

Thompson, 2012-08-07 Have you ever wondered whether the forensic science you've seen on TV is anything like the real thing? There's no better way to find out than to roll up your sleeves and do it yourself. This full color book offers advice for setting up an inexpensive home lab and includes more than 50 hands-on lab sessions that deal with forensic science experiments in biology, chemistry, and physics. You'll learn the practical skills and fundamental knowledge needed to pursue forensics as a lifelong hobby or even a career. The forensic science procedures in this book are not merely educational; they're the real deal. Each chapter includes one or more lab sessions devoted to a particular topic. You'll find a complete list of equipment and chemicals you need for each session. Analyze soil, hair, and fibers. Match glass and plastic specimens. Develop latent fingerprints and reveal blood traces. Conduct drug and toxicology tests. Analyze gunshot and explosives residues. Detect forgeries and fakes. Analyze impressions such as tool marks and footprints. Match pollen and diatom samples. Extract, isolate, and visualize DNA samples. Through their company, The Home Scientist LLC, thomescientist.com, the authors also offer inexpensive custom kits that provide specialized equipment and supplies you'll need to complete the experiments. Add a microscope and some common household items, and you're good to go.

Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1982 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications. September issue includes List of depository libraries. June and December issues include semiannual index. Resources in Education, 1984 **Monthly Catalogue, United States Public Documents**, 1982

Physical Science Experiments Pam Walker, Elaine Wood, 2010 Presents new tested experiments related to the intriguing field of physical science. The experiments are designed to promote interest in science in and out of the classroom and to improve critical thinking skills. Philology, Or the Science of Activities Designed for Expression John Wesley Powell, 1903

Christian Science War Time Activities First Church of Christ, Scientist (Boston, Mass.). War Relief Committee, 1922 Proceedings of the Society for Horticultural Science Society for Horticultural Science (U.S.), 1916 **Teachers' Guide to Keystone Primary Set** Laura Zirbes, 1927 **Science Activities Using the World Wide Web** Kathy Sage, 1999

Get kids wired up then fired up with this step by step guide to using the Internet to study six science topics: flight, germs, simple machines, sharks, the digestive system, and weather. Each topic includes Web search directions, Web addresses, and model lessons for the whole class, small groups, or individuals. Reproducible and clear directions for both teachers and students make this book a practical tool to blend teaching with technology. *Bulletin -*
