Interiors in the Era of Covid-19 Penny Sparke, Ersi Ioannidou, Pat Kirkham, Stephen Knott, Jana Scholze, 2023-01-26 The Covid-19 lockdowns caused people worldwide to be confined to their homes for longer and on a greater scale than ever before. This forced many unprecedented changes to the way we treat domestic space as relationships shifted between the public and the private worlds and homes were rapidly adapted to accommodate the additional roles of schools, offices, gyms, restaurants, making spaces and more. Above all, our understanding of the home as a site to support and enhance the well-being of its inhabitants changed in a variety of novel ways. *Interiors in the Era of Covid* is a collection of essays which explore the complex ways in which our inside spaces, contemporary and historical, have responded to Covid-19 and other human crises. With case studies ranging from US and Europe to Japan, China, Colombia, and Bangladesh, this is a truly global work which examines wide-ranging subjects from home working and home technologies to the impact of lockdown on people's identities, gender roles in the home, and the realities of domestic living with Covid in refugee camps. Exploring the roles played by designers, both amateur and professional, in accommodating changing requirements and anticipating future ones, whether Covid or beyond, this book is a must-read for students and researchers in interior design, architecture, architectural and design history, and anyone interested in the home and the relationships between health and design.

TRYST WITH DIGNITY & HONOUR BRIGADIER DINESH MATHUR (RETIRED), 2021-11-15

A Practical Guide to Head Injury Rehabilitation Michael D. Wesolowski, Arnie H. Zencius, 2013-06-29 Behavioral neuropsychology presents at once a challenge and an opportunity for the field of behavior analysis A great diversity of problem areas including education classroom management child rearing retardation and industry have been treated effectively by the behavior analytic approach which has traditionally and quite deliberately chosen to deemphasize physiology and cognitive variables Yet brain injury by its nature entails neurological insult that is often closely related to specific cognitive dysfunctions The challenge for behavior analysis is to develop effective treatments for a disorder with such clearly defined tripartite characteristics The opportunity exists for behavior analysis to expand its conceptual basis as well as to provide benefits to patients otherwise despairing of assistance Case histories demonstrate over 20 years of

successful applications of behavior analysis to brain injured individuals indicating that some applications are possible but are these reports notable exceptions or the harbingers of a new general therapeutic approach The present book describes an overall focused behavioral program for dealing with the diversity of brain injury problems in a general brain injury rehabilitation setting The authors describe what types of neurological damage are associated with specific types of cognitive emotional dysfunction and in turn with specific types of behavioral dysfunction thereby demonstrating how the choice of behavioral treatment is guided by the neurological and subjective assessment The result is a conceptually unified approach The distinctive value of this book lies in the detail as well as the programmatic guidelines for actual implementation of this behavioral approach
