Martin Reardon,2017-03-01 This volume explores the impact of research practice partnerships in education broadly conceived on communities in which such partnerships operate By invitation some of the partnerships celebrated in this volume are firmly established while others are more embryonic some directly engage community members while others are nurtured in and by supportive communities Collectively however the eleven chapters constitute a range of compelling instances of knowledge utilization knowledge mobilization and offer a counter narrative to the stereotypical divide between researchers and practitioners Educational researchers and educational practitioners reside in and are both politically supported and socially sustained by their local communities The nesting of researchers and practitioners collaborative decision making and action in the financial social organizational and political contexts of the community together with the intended and unintended outcomes of those decisions and actions speaks to the essence of community impact in the context of this volume **Child Development: An Active Learning Approach** Laura E. Levine,Joyce Munsch,2010-09-16 Although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students few textbooks currently exist that actually do this *Explaining Individual Differences in Reading* Susan A. Brady,David Braze,Carol A. Fowler,2011-05-09 Research into reading development and reading disabilities has been dominated by phonologically guided theories for several decades In this volume the authors of 11 chapters report on a wide array of current research topics examining the scope limits and implications of a phonological theory The chapters are organized in four sections The first concerns the nature of the relations between script and speech that make reading possible considering how different theories

of phonology may illuminate the implication of these relations for reading development and skill The second set of chapters focuses on phonological factors in reading acquisition that pertain to early language development effects of dialect the role of instruction and orthographic learning The third section identifies factors beyond the phonological that may influence success in learning to read by examining cognitive limitations that are sometimes co morbid with reading disabilities contrasting the profiles of specific language impairment and dyslexia and considering the impact of particular languages and orthographies on language acquisition Finally in the fourth section behavioral genetic and neurological methods are used to further develop explanations of reading differences and early literacy development The volume is an essential resource for researchers interested in the cognitive foundations of reading and literacy language and communication disorders or psycholinguistics and those working in reading disabilities learning disabilities special education and the teaching of reading
