web nov 14 2022 magnetism is the force exerted by magnets when they attract or repel each other magnetism is caused by the motion of electric charges every substance is made up of tiny units called atoms each atom has electrons particles that carry electric charges spinning like tops the electrons circle the nucleus or core of an atom their

web dec 3 2019 magnetism is the force present in and between all objects that is produced by the motion of electrons and that results in the attraction and repulsion of different objects it is a noncontact force that affects every single different object in the world to a greater or less extent and that is the result of the movement of these
