Interdisciplinary Research in Diabetology Ali Tootee, Bagher Larijani, Ping Wang, 2024-10-04 The prevalence of diabetes has alarmingly increased in both developed and developing countries in recent years The prevalence of different complications and comorbid conditions associated with diabetes has also rampantly increased thereby endangering the lives of patients with diabetes In fact obesity which is associated with diabetes is currently a major global public health concern Nevertheless it can be argued that little progress has been made in the field of the management of diabetes during the past decades and many believe that the discovery of insulin was not followed by further significant advancements in the management of diabetes Diagnostic and screening approaches to diabetes have considerably evolved in recent decades Saccharometers are replaced by glucometers and elaborated laboratory techniques However there are still limitations to such technologies and they cannot be used on large scales and in pediatric endocrinology they are not well complied with In fact it may be argued that the progress we have made in the management of diabetes has mainly focused on the invention of more efficient insulin preparations and improved techniques for its delivery

Circadian Rhythms and Health Research Trends Alfredo V. Lignelli, 2007 A circadian rhythm is a roughly 24 hour cycle in the physiological processes of living beings including plants animals fungi and cyanobacteria The term circadian comes from the Latin circa around and dies day meaning literally about a day The formal study of biological temporal rhythms such as daily weekly seasonal and annual rhythms is called chronobiology In a strict sense circadian rhythms are endogenously generated although they can be modulated by external cues such as sunlight and temperature Most of a person's body systems demonstrate circadian variations The body systems with the most prominent circadian variations are the sleep wake cycle the temperature regulation system and the endocrine system The malfunctioning of a person's circadian system or biological clock causes circadian rhythm disorders Circadian rhythms and their relation to health outcomes in the globalised hyper world of the 21st century are now understood to be extremely important
