The Discursive Construction of Place in the Digital Age Alejandro Parini, Francisco Yus, 2023-06-30 This collection calls for greater attention to the need for a clearer understanding of the role of discourse in the process of placemaking in the digital age and the increasing hybridisation of physical and virtual worlds The volume outlines a new conceptualisation of place in the time of smartphones whose technological and social affordances evoke placemaking as a collaborative endeavour which allows users to create and maintain a sense of community around place as shareable or collective experience Taken together the chapters argue for a greater emphasis on the ways in which users employ discourse to manage this physical virtual interface in digital interactions and in turn produce remixed cultural practices that draw on diverse digital semiotic resources and reflect their everyday experiences of place and location The book explores a wide range of topics and contexts which embody these dynamics including livestreaming platforms mourning in the digital age e service encounters and Internet forums While the overlay of physical and virtual information on location based media is not a new phenomenon this volume argues that in the face of its increasing pervasiveness we can better understand its unfolding and future directions for research by accounting for the significance of place in today's interactions This book will be of interest to students and scholars in discourse analysis digital communication pragmatics and media studies
