*Indigenous Currencies* Ashley Cordes, 2025-04-22 How Indigenous currencies including wampum and dentalium shells beads and the cryptocurrency MazaCoin have long constituted a form of resistance to settler colonialism Indigenous Currencies follows dynamic stories of currency as a meaning making communication technology Settler economies regard currency as their own invention casting Indigenous systems of value exchange and data stewardship as incompatible with contemporary markets In this book Ashley Cordes refutes such claims and describes a long history of Indigenous innovation in currencies including wampum dentalium beads and more recently the cryptocurrency MazaCoin By looking closely at how currencies developed over time through intercultural communication Cordes argues that Indigenous currencies transcend the scope of economic value revealing the cultural social and political context of what it means to exchange The book s two main case studies the gold rush and the code rush frame a deep dive into how Indigenous ways of being have shaped the use and significance of currency and vice versa Settler currencies which have developed in the wake of wars and through massively scaled forms of material extraction

offer a very different story of the place of currencies within settler economies of dispossession The second part of the study asks how contemporary cryptocurrencies may play a critical role in cultivating Tribal sovereignty The author analyzes structural properties of the polymorphic blockchain to provide key insights into how emergent digital spaces with their attendant forms of meaning and value represented by code NFTs and Web 3 0 are inextricably connected to Indigenous knowledges The book cultivates a vision of currency in which the principle of leaving some for the rest establishes a way of imagining relationships of exchange beyond their enclosure within settler capitalist parameters of extraction and into currents of deep reciprocity *Let's Get Technical!* Eric Elder,2024-10-23 Do you have a message to share with the world I

that than having a copy of Buffett's Tips close at hand Hijacking America Joe McHugh, 2022-08-01 Hijacking America Liberty Strikes Back is the true story of a Marine Corps Officer fighting for freedom from the unconstitutional actions of his own government. The government wrongly suspected that Joe McHugh had stolen information related to 9/11 being an inside job and they were going to prevent the truth from coming to light by any means necessary. In the seven years that followed his separation from the Marine Corps, McHugh learned the tricks of surveillance and entrapment from those keeping tabs on him, the unsettling truth of democracy in America that our rights are a lie under the secret FISA court system and the USA PATRIOT Act and how to restore liberty in America by ending the Fed and going green instead with a credit union. McHugh takes you from the plane strikes on September 11 through his service as a Marine and survival effort following through the peak of obstruction and entrapment in Puerto Rico. If you're interested in liberty, America, our Constitution, the means by which our unconstitutional government maintains the surveillance state and how to reverse it, then this is the book for you. Let every nation know whether it wishes us well or ill that we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe in order to assure the survival and the success of liberty. John F. Kennedy *Class Dismissed* Anthony Abraham Jack, 2024-08-13 A book that examines how structural inequalities directly influence undergraduate life. Universities love to talk about diversity. They spend millions of dollars advertising just how diverse they are, offering diversity statistics that are personalized with pictures. But Anthony Jack argues that this is a superficial approach. He calls it a gift shop approach that displays groups like trinkets and fails to truly serve students from underrepresented groups. Moreover, social class is almost entirely absent from the conversation. Never before have the platitudes of diversity left universities ill-prepared to support their students, especially those who are lower income and/or first generation, than during the COVID-19 pandemic. This book sheds light on how entrenched inequalities in students' homes and communities shape undergraduate life through the lens of how students coped with COVID-19, navigated social unrest, and experienced problems of race. Jack draws on 160 in-depth interviews with a representative sample of Asian, Black, Latino, Native, and White undergraduates at Harvard and 20 interviews with students from other universities. He first examines students' home lives prior to college and campus closures and explores how the pandemic shaped their lives away from campus. He looks at those who have jobs and explores how the divergent work experiences that students have shape their broader college experience. He looks at students' strategies for navigating campus, including peer group formation and acclimation to college. The final empirical chapter explores how students understand and navigate racial unrest both on campus and in America and how their experiences vary by race. The conclusion will outline sensible and practical solutions to aid colleges in their quest to help all students.
