The Apple TV Crash Course Thomas Belle, 2015-03-26 Mac iPhone iPad Apple TV While Apple TV may not get the same press as other Apple products that is about to change For years Apple TV was touted on Apple's hobby product something they tinkered with occasionally but not something they put as much effort in as other Apple products This changed in 2012 Apple announced a slimmed down version of the media device at a price people could actually afford 99 In March of 2015 they dropped the price again to 69 and announced that they would be the first devices to offer HBO's monthly streaming service HBO Now What started as a hobby has turned into a powerhouse The low cost high powered streaming media player has become the best on the market Other companies notably Google Amazon and Roku have tried to create their own media devices but in this author's opinion none of them come close to offering an operating system that just works This guide is an introduction to Apple TV If you are just thinking about making the switch from cable to streaming TV then this book will show you how if you've already made the switch but you want to get the most out of it then it will cover that as well There's something for everyone here so read on
