Pathways to International Publication in the Social Sciences
Insung Jung,2025-01-20 This guide offers a clear step by step approach for graduate students and early career researchers especially non native English speakers seeking to publish in international journals in the social sciences It provides practical strategies for preparing submitting and refining research papers helping researchers navigate the challenges of academic publishing With 21 chapters the guide covers every stage of writing revising and submission while addressing the unique obstacles faced by non native English speakers The guide helps researchers identify reputable journals avoid predatory ones and use digital tools to meet international standards It then provides a structured roadmap that simplifies the publication process covering steps like journal selection writing compelling abstracts and drafting the methods and results sections By the end of the guide it is expected that researchers will have a strong first draft or ideally a submission ready manuscript The guide also addresses language barriers cultural differences and unfamiliarity with international conventions It offers practical solutions for improving English writing utilizing digital tools responding to peer reviews and managing revisions effectively It emphasizes ethical guidelines like avoiding plagiarism properly crediting co authors and ensuring research transparency to help researchers meet global standards Unlike other research guides this one is specifically tailored to early career and non native English researchers working in social science disciplines It offers practical strategies and real world examples to equip researchers and teachers of research methods and academic writing with a framework for achieving publishing success in global academia

Proceedings of the 2025 4th International Conference on Social Sciences and Humanities and Arts (SSHA 2025)
Sun Jing,Sun Hefei,Liu Shuli,Ren Xianpin,Cuneyt Birkok,2025-07-22 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the

development of prosperous social sciences are the eternal themes of human beings. At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science. Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators. Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching. The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions. And by reacting to today's increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society. By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc.
