Mental Health Tips Stem Kits Update:

Mental Health Survival Kit and Withdrawal from Psychiatric Drugs Peter C. Gøtzsche ,2021-12-06 This book can help people with mental health issues to survive and return to a normal life Citizens believe and the science shows that medications for depression and psychosis and admission to a psychiatric ward are more often harmful than beneficial Yet most patients take psychiatric drugs for years Doctors have made hundreds of millions of patients dependent on psychiatric drugs without knowing how to help them taper off the drugs safely which can be very difficult The book explains in detail how harmful psychiatric drugs are and gives detailed advice about how to come off them You will learn why you should not see a psychiatrist if you have a mental health issue that psychiatric drugs are addictive that the biggest lie in psychiatry is the one about a chemical imbalance being the cause of psychiatric disorders that psychiatric diagnoses are unscientific and that doctors disagree widely when making diagnoses that psychiatric drugs can lead to permanent brain damage that psychiatric drugs should never be stopped abruptly because withdrawal reactions can be dangerous why psychotherapy and other psychosocial interventions should be preferred over drugs why you should generally not believe what doctors tell you about psychiatric disorders and their treatment why volunteers have found the book so important that they have translated it into French Portuguese and Spanish Peter G tzsche has written a very personal account of his battle to get the institution of psychiatry to accept that its drugs are not the magic pills they are made out to be Every medical practitioner who prescribes them and every person who takes them should read this book and be warned Niall McLaren author of Anxiety The Inside Story Peter G tzsche s new book meets patients need to get tools on how to deal with psychoactive drugs and above all not to start them G tzsche is very clear about the role of GPs in medicalizing grief misfortune opposition and bad luck In this he finds the American emeritus professor of psychiatry and chairman of the DSM III committee Allen Frances at his side Both G tzsche and Frances have repeatedly stated that psychoactive drugs should not be prescribed by GPs because they lack experience in their use And above all unhappiness grief and bad luck are not signs of brain disorders they belong to daily life Additionally G tzsche reveals that most psychoactive drugs do not work they might only achieve statistically significant differences compared to placebo but that s not what patients need Dick Bijl former GP epidemiologist and current president of the International Society of Drug Bulletins Peter C G tzsche wrote this book to help people with mental health problems survive and return to a normal life His book explains in detail how psychiatric drugs are harmful and people are told how they can safely withdraw from them It also advises on how people with mental health problems can avoid making a career as a psychiatric patient and losing 10 or 15 years of their life to psychiatry You will find precious material to help plan and accompany this process of liberation from psychiatry Fernando Freitas PhD Psychologist Full Professor and Researcher at the National School of Public Health ENSP FIOCRUZ Co editor of Mad in Brazil In this work addressed to people affected by the risk of being caught in the system of attention to mental health issues Dr G tzsche succinctly exposes without beating

about the bush the damage caused by psychiatric medications demonstrates that their widespread use is not based on evidence which is mainly driven by commercial pressures that have nothing to do with the recovery of patients and present safe ways to dispose of them always gradually and under supervision of trustworthy people to minimize the syndrome of abstinence and successfully overcome all the difficulties that the process involves Enric Garc a Torrents writing for Mad in Spain Learn more at www.scientificfreedom.dk From the Institute for Scientific Freedom *SAMHSA News*, 2009

Self-Help in Mental Health T. Mark Harwood,Luciano L'Abate,2009-11-24 Self help is big business but alas not a scientific business The estimated 10 billion that is spent each year on self help in the United States is rarely guided by research or monitored by mental health professionals Instead marketing and metaphysics triumph The more outrageous the miraculous cure and the revolutionary secret the better the sales Of the 3 000 plus self help books published each year only a dozen contain controlled research documenting their effectiveness as stand alone self help Of the 20 000 plus psychological and relationship web sites available on the Internet only a couple hundred meet professional standards for accuracy and balance Most in fact sell a commercial product Pity the layperson or for that matter the practitioner trying to navigate the self help morass We are bombarded with thousands of potential resources and contradictory advice Should we seek wisdom in a self help book an online site a 12 step group an engaging autobiography a treatment manual an inspiring movie or distance writing Should we just do it or just say no Work toward change or accept what is Love your inner child or grow out of your Peter Pan I become confused and discouraged just contemplating the choices
