PROFESSIONAL PROFILE

Specialist STEM graduate with professional experience as an Junior Engineer and a masters degree in Renewable Energy looking to work in research and development of low carbon energy solutions. ACU-Certified AutoCAD Professional with demonstrated success in cost-effective end-to-end product development. Proficiency in data analysis and site audit.

EDUCATION

- **Master in Renewable Energy** | Boston College | May 2021 – Mar 2023 | 4.0 GPA
Modules: Low Carbon Models, Ground Source Thermodynamics, Applied Principles, Project Management, Low-Impact Excavatory Research, Biomass and Fuel Cell
Project: Building a model for proactive energy consumption calculations*
- **Certified AutoCAD Professional** | ACU | Jan 2022
- **Bachelor of Science in Engineering** | Crimpton College | Sep 2016 – May 2020 | 3.9 GPA | Skytar Scholarship for Engineering
Modules: Fluid Mechanics, Heat Transfer, Engineering Thermodynamics, Nuclear Systems, Mechanical Design, Smart Materials, Renewable Energy Systems
Thesis: 'A simplified fluid dynamics model of ultrafiltration for water systems'
- **High School Diploma** | Lincoln High School | Sep 2012 – Jun 2016 | 3.7 GPA | Honour Roll

CAREER SUMMARY

Jun 2020 – May 2021

TFT, Boston, MA
Junior Engineer

Outline

Completed the 12 month graduate programme at leading US energy provider, TFT, contributing to multiple projects in the commercial installation team.

Key Responsibilities

- Completed energy audits and produced relevant reports
- Worked with a team of engineers to complete in-depth site audits of commercial and domestic properties, including ground analysis and social impact reports
- Conducted analysis of complex data and presented it at project meetings
- Researched and identified energy saving opportunities for current projects
- Built computer models using Python to automate energy saving calculations

Key Achievements

- Saved £3.2k per month for the company by changing the supplier for titanium HPAV.
- Delivered a £2.1 million project 6 weeks early in March 2021 due to effective and accurate pre-project reports and audits.

Stem Cells in Human Reproduction Carlos Simón, Antonio Pellicer, 2009-09-18 Following a successful first edition this new book updates the revolutionary advances in stem cell science that may potentially impact human reproductive medicine The contents cover the production and regeneration of female and male germ cells trophoblasts and endometrium from human embryonic and adult stem cells New developments in hESC d The World's Major Languages Bernard Comrie, 1987 Detailed guide to the world s forty major languages with full historical sociological and linguistic information Yachting, 1985-04 **Functional analysis of species-specific noncoding RNAs in plants** Yuepeng Song, Mahmoud Yaish, Deqiang Zhang, Yun Zheng, Lianfeng Gu, Byeong-ha Lee, 2023-02-01 A Grammar of Hup Patience Epps, 2008-08-27 This work is a reference grammar of Hup a member of the Nadahup family also known as Mak or Vaup s Japura which is spoken in the fascinatingly multilingual Vaup s region of the northwest Amazon This detailed description and analysis is informed by a functional typological perspective with particular reference to areal contact and grammaticalization The grammar begins with an introduction to the cultural and linguistic background of Hup speakers gives an overview of the phonology and follows this with chapters on morphosyntax nominal morphology verbs and verb compounding tense aspect modality evidentiality etc it concludes with discussions of negation the simple clause and clause combining A number of features of Hup grammar are typologically significant such as its strategy of inversion in question formation its system of Differential Object Marking and its treatment of possession Hup also exhibits several highly unusual paths of grammaticalization such as the development of a verbal future suffix from the noun stick tree The book also includes a selection of texts and a CD ROM with audio files Computerworld, 1996-05-13 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Plant Organ Abscission: From Models to Crops**

Timothy J. Tranbarger, Mark L. Tucker, Jeremy A. Roberts, Shimon Meir, 2017-11-22 Plant organ abscission is a developmental process regulated by the environment stress pathogens and the physiological status of the plant In particular seed and fruit abscission play an important role in seed dispersion and plant reproductive success and are common domestication traits with important agronomic consequences for many crop species Indeed in natural populations shedding of the seed or fruit at the correct time is essential for reproductive success while for crop species the premature or lack of abscission may be either beneficial or detrimental to crop productivity The use of model plants in particular Arabidopsis and tomato have led to major advances in our understanding of the molecular and cellular mechanisms underlying organ abscission and now many workers pursue the translation of these advances to crop species Organ abscission involves specialized cell layers called the abscission zone AZ where abscission signals are perceived and cell separation takes place for the organ to be shed A general

model for plant organ abscission includes 1 the differentiation of the AZ 2 the acquisition of AZ cells to become competent to respond to various abscission signals 3 response to signals and the activation of the molecular and cellular processes that lead to cell separation in the AZ and 4 the post abscission events related to protection of exposed cells after the organ has been shed While this simple four phase framework is helpful to describe the abscission process the exact mechanisms of each stage the differences between organ types and amongst diverse species and in response to different abscission inducing signals are far from elucidated For an organ to be shed AZ cells must transduce a multitude of both endogenous and exogenous signals that lead to transcriptional and cellular and ultimately cell wall modifications necessary for adjacent cells to separate How these key processes have been adapted during evolution to allow for organ abscission to take place in different locations and under different conditions is unknown The aim of the current proposal is to present and be able to compare recent results on our understanding of organ abscission from model and crop species and to provide a basis to understand both the evolution of abscission in plants and the translation of advances with model plants for applications in crop species

Plants, Pollutants and Remediation Münir Öztürk, Muhammad Ashraf, Ahmet Aksoy, M. S. A. Ahmad, Khalid Rehman Hakeem, 2016-01-12 In the era of current industrial and civil development everyone is expressing a deep concern about the problem of environmental pollution The majority of the global community has a vested interest in supporting and sustaining any move for the protection of environment In the greater part of the last century it was the fast pace of industrialization galloping demand for energy and reckless exploitation of natural resources that were mainly responsible for creating the problem of environmental pollution In the current scenario high illiteracy rates of the developing nations leads to increasing environmental pollution When it comes to the hazards of environmental pollution there is only a very thin dividing line between different countries One pollutes and the other suffers there are no eventual winners without significant changes globally Pollution is posing serious threats to all kinds of diversities on earth in particular plants The plant world is of vital importance for our planet It is a worldwide priority aimed at better meeting the needs for food livelihoods and nature To meet the food demand of fast growing population global food production will have to be doubled The sustainability of food production depends on the sustainability of plant resources and using tolerant varieties to augment food production This volume therefore covers discussions on the recent developments in this connection and the emerging role of plants as indicators remediation and such related issues as biodiversity conservation and the effects of on edible plants It reviews issues concerning the future of plant life Taking cognizance of this several experts from different parts of the globe have contributed from their experience and knowledge to the critical issues of Environmental Pollution and the Role of Plants in this connection

Concise Encyclopedia of Languages of the World ,2010-04-06 Concise Encyclopedia of Languages of

the World is an authoritative single volume reference resource comprehensively describing the major languages and language families of the world. It will provide full descriptions of the phonology, semantics, morphology, and syntax of the world's major languages, giving insights into their structure, history, and development, sounds, meaning, structure, and language family, thereby both highlighting their diversity for comparative study and contextualizing them according to their genetic relationships and regional distribution. Based on the highly acclaimed and award-winning *Encyclopedia of Language and Linguistics*, this volume will provide an edited collection of almost 400 articles throughout which a representative subset of the world's major languages are unfolded and explained in up-to-date terminology and authoritative interpretation by the leading scholars in linguistics. In highlighting the diversity of the world's languages from the thriving to the endangered and extinct, this work will be the first point of call to any language expert interested in this huge area. No other single volume will match the extent of language coverage or the authority of the contributors of *Concise Encyclopedia of Languages of the World*. Extraordinary breadth of coverage: a comprehensive selection of just under 400 articles covering the world's major languages, language families, and classification structures, issues, and dispute. Peerless quality based on 20 years of academic development on two editions of the leading reference resource in linguistics, *Encyclopedia of Language and Linguistics*. Unique authorship: 350 of the world's leading experts brought together for one purpose. Exceptional editorial selection, review, and validation process. Keith Brown and Sarah Ogilvie act as first-tier guarantors for article quality and coverage. Compact and affordable one-volume format makes this suitable for personal study at any institution interested in areal, descriptive, or comparative language study, and at a fraction of the cost of the full encyclopedia.

[The Development of Prosodic Structure in Early Words](#) Mitsuhiko Ota, 2003-12-19. This monograph addresses three basic questions regarding the development of word internal prosodic structure: How much of the phonological structure of early words is regulated by the same constituents and principles that govern the organization of prosodic structure of mature grammar? Why do early words diverge from the adult targets in shape and size? And what is the best way to model developmental changes that occur in prosodic structure? Answers to these questions are explored through the longitudinal analysis of spontaneous production data from child Japanese. The analysis provides new types of evidence and new arguments that the prosodic phonology of young children is largely continuous with that of adults, and that the surface child-adult divergence in word forms and the overall pattern of developmental changes are best explained in terms of ranked violable constraints on the representation of prosodic structure whose ordering is modified in the course of acquisition.

[Gastroparesis](#) Richard McCallum, Henry Parkman, John Clarke, Braden Kuo, 2020-09-30. *Gastroparesis: Pathophysiology, Clinical Presentation, Diagnosis, and Treatment* is a reference book providing a centralized source of data on gastroparesis collected over the last decade. Contents include the pathophysiology, clinical presentation, diagnostic recommendations, and treatment options for

gastroparesis The reference is split into broad subsections with the strategy of first focusing on the key features of the disease and then turning to controversies recent developments patient support resources the spectrum of treatment including medical and surgical and future directions Chapters will include coverage of important topics like autonomic neuropathy the brain gut axis potential pathophysiological advances at the cellular level diagnostic and therapeutic options specifically targeted at the pylorus and the evaluation of the female predominance in gastroparesis This is a must have resource for scientists looking to find the next step in their research as well as healthcare professionals ranging from Gastroenterologists to Internists Surgeons Nutritionists Psychiatrists and Psychologists Residents and Medical Students who struggle with how to optimally take care of their gastroparetic patients Provides a comprehensive overview of what is known regarding the pathophysiology clinical presentation diagnostic considerations and treatment options for gastroparesis Includes key updates made in the last decade including the progress made by the NIH Gastroparesis Consortium Presents both sides of key controversies in the field including the debate between classification of gastroparesis versus functional dyspepsia Fully reviews the major advances in pharmacologic agents for therapy both anti emetics and prokinetics Extensive update on the Pyloric Revolution and our understanding of the pathophysiology of gastroparesis and how the focus on the pylorus has literally transformed our treatment strategy with an emphasis on both surgical and endoscopic advances in addressing pyloric dysfunction

The languages of Malta Albert Gatt, 2018 The purpose of this volume is to present a snapshot of the state of the art of research on the languages of the Maltese islands which include spoken Maltese Maltese English and Maltese Sign Language Malta is a tiny but densely populated country with over 422 000 inhabitants spread over only 316 square kilometers It is a bilingual country with Maltese and English enjoying the status of official languages Maltese is a descendant of Arabic but due to the history of the island it has borrowed extensively from Sicilian Italian and English Furthermore local dialects still coexist alongside the official standard language The status of English as a second language dates back to British colonial rule and just as in other former British colonies a characteristic Maltese variety of English has developed To these languages must be added Maltese Sign Language which is the language of the Maltese Deaf community This was recently recognised as Malta's third official language by an act of Parliament in 2016 While a volume such as the present one can hardly do justice to all aspects of a diverse and complex linguistic situation even in a small community like that of Malta our aim in editing this book was to shed light on the main strands of research being undertaken in the Maltese linguistic context Six of the contributions in this book focus on Maltese and explore a broad range of topics including historical changes in the Maltese sound system syllabification strategies the interaction of prosody and gesture the constraints regulating t insertion the productivity of derivational suffixes and raising phenomena The study of Maltese English especially with the purpose of establishing the defining characteristics of this variety of English is a relatively new area of research Three of the papers in this volume deal with Maltese English which is explored from the different

perspectives of rhythm the syntax of nominal phrases and lexical choice The last contribution discusses the way in which Maltese Sign Language LSM has evolved alongside developments in LSM research In summary we believe the present volume has the potential to present a unique snapshot of a complex linguistic situation in a geographically restricted area Given the nature and range of topics proposed the volume will likely be of interest to researchers in both theoretical and comparative linguistics as well as those working with experimental and corpus based methodologies Our hope is that the studies presented here will also serve to pave the way for further research on the languages of Malta encouraging researchers to also take new directions including the exploration of variation and sociolinguistic factors which while often raised as explanatory constructs in the papers presented here remain under researched

The Major Languages of East and South-East Asia Bernard Comrie, 2022-02-16 Based on Bernard Comrie's much praised *The World's Major Languages* this is a key guide to an important language family The areas covered include Chinese Japanese and Sino-Tibetan languages
