

The image features the OpenAI logo, which consists of the word "OpenAI" in a white, sans-serif font. The logo is centered horizontally and positioned in the upper-middle part of the frame. The background is a landscape photograph showing dark, silhouetted mountain peaks in the foreground and middle ground. Above the mountains, the sky is filled with soft, wispy clouds in shades of blue and purple, suggesting a twilight or dawn setting. The overall color palette is cool and atmospheric, with the white text providing a strong contrast against the darker background elements.

Hands-On Artificial Intelligence for IoT Dr. Amita Kapoor, 2025-05-16 Master AI and IoT integration from fundamentals to advanced techniques and revolutionize your approach to building intelligent data driven solutions across industries Key Features Leverage the power of Python libraries such as TensorFlow and Keras to work with real time IoT data Enhance your IoT solutions with advanced AI techniques including deep learning optimization and generative adversarial networks Gain practical insights through industry specific IoT case studies in manufacturing smart cities and automation Purchase of the print or Kindle book includes a free PDF eBook Book Description Transform IoT devices into intelligent systems with this comprehensive guide by Amita Kapoor Chief AI Officer at Tipz AI Drawing on 25 years of expertise in developing intelligent systems across industries she demonstrates how to harness the combined power of artificial intelligence and IoT technology A pioneer in making AI and neuroscience education accessible worldwide Amita guides you through creating smart efficient systems that leverage the latest advances in both fields This new edition is updated with various optimization techniques in IoT used for enhancing efficiency and performance It introduces you to cloud platforms such as Platform as a Service PaaS and Infrastructure as a Service IaaS for analyzing data generated using IoT devices You ll learn about machine learning algorithms deep learning techniques and practical applications in real world IoT scenarios and advance to creating AI models that work with diverse data types including time series images and audio You ll also harness the power of widely used Python libraries TensorFlow and Keras to build a variety of smart AI models By the end of the book you ll emerge as a master of AI driven IoT armed with invaluable experience in optimizing IoT devices boosting their performance and integrating AI algorithms to make intelligent decisions What you will learn Integrate AI and IoT for enhanced device intelligence Understand how to build scalable and efficient IoT systems Master both supervised and unsupervised machine learning techniques for processing IoT data Explore the full potential of deep learning in IoT applications Discover AI driven strategies to optimize IoT system efficiency Implement real world IoT projects that leverage AI capabilities Improve device performance and decision making using AI algorithms Who this book is for This book is for IoT developers engineers and tech enthusiasts particularly those with a background in Python looking to integrate artificial intelligence and machine learning into IoT systems Python developers eager to apply their knowledge in new innovative ways will find it useful It s also an invaluable guide for anyone with a foundational understanding of IoT concepts ready to take their skills to the next level and shape the future of intelligent devices

Building Neo4j-Powered Applications with LLMs Ravindranatha Anthapu, Siddhant Agarwal, 2025-06-20 A comprehensive guide to building cutting edge generative AI applications using Neo4j s knowledge graphs and vector search capabilities Key Features Design vector search and recommendation systems with LLMs using Neo4j GenAI Haystack Spring AI and LangChain4j Apply best practices for graph exploration modeling reasoning and performance optimization Build and consume Neo4j knowledge graphs and deploy your GenAI apps to Google Cloud

Purchase of the print or Kindle book includes a free PDF eBook Book Description Embark on an expert led journey into building LLM powered applications using Retrieval Augmented Generation RAG and Neo4j knowledge graphs Written by Ravindranatha Anthapu Principal Consultant at Neo4j and Siddhant Agrawal a Google Developer Expert in GenAI this comprehensive guide is your starting point for exploring alternatives to LangChain covering frameworks such as Haystack Spring AI and LangChain4j As LLMs large language models reshape how businesses interact with customers this book helps you develop intelligent applications using RAG architecture and knowledge graphs with a strong focus on overcoming one of AI s most persistent challenges mitigating hallucinations You ll learn how to model and construct Neo4j knowledge graphs with Cypher to enhance the accuracy and relevance of LLM responses Through real world use cases like vector powered search and personalized recommendations the authors help you build hands on experience with Neo4j GenAI integrations across Haystack and Spring AI With access to a companion GitHub repository you ll work through code heavy examples to confidently build and deploy GenAI apps on Google Cloud By the end of this book you ll have the skills to ground LLMs with RAG and Neo4j optimize graph performance and strategically select the right cloud platform for your GenAI applications What you will learn Design populate and integrate a Neo4j knowledge graph with RAG Model data for knowledge graphs Integrate AI powered search to enhance knowledge exploration Maintain and monitor your AI search application with Haystack Use LangChain4j and Spring AI for recommendations and personalization Seamlessly deploy your applications to Google Cloud Platform Who this book is for This LLM book is for database developers and data scientists who want to leverage knowledge graphs with Neo4j and its vector search capabilities to build intelligent search and recommendation systems Working knowledge of Python and Java is essential to follow along Familiarity with Neo4j the Cypher query language and fundamental concepts of databases will come in handy

[A Simple Guide to Retrieval Augmented Generation](#) Abhinav Kimothi, 2025-07-01 Everything you need to know about Retrieval Augmented Generation in one human friendly guide Augmented Generation or RAG enhances an LLM s available data by adding context from an external knowledge base so it can answer accurately about proprietary content recent information and even live conversations RAG is powerful and with A Simple Guide to Retrieval Augmented Generation it s also easy to understand and implement In A Simple Guide to Retrieval Augmented Generation you ll learn The components of a RAG system How to create a RAG knowledge base The indexing and generation pipeline Evaluating a RAG system Advanced RAG strategies RAG tools technologies and frameworks A Simple Guide to Retrieval Augmented Generation gives an easy yet comprehensive introduction to RAG for AI beginners You ll go from basic RAG that uses indexing and generation pipelines to modular RAG and multimodal data from images spreadsheets and more About the Technology If you want to use a large language model to answer questions about your specific business you re out of luck The LLM probably knows nothing about it and may even make up a response Retrieval Augmented Generation is an approach that solves this class of problems The model first retrieves the most relevant pieces of information

from your knowledge stores search index vector database or a set of documents and then generates its answer using the user's prompt and the retrieved material as context This avoids hallucination and lets you decide what it says

About the Book A Simple Guide to Retrieval Augmented Generation is a plain English guide to RAG The book is easy to follow and packed with realistic Python code examples It takes you concept by concept from your first steps with RAG to advanced approaches exploring how tools like LangChain and Python libraries make RAG easy And to make sure you really understand how RAG works you'll build a complete system yourself even if you're new to AI

What's Inside RAG components and applications Evaluating RAG systems Tools and frameworks for implementing RAG

About the Readers For data scientists engineers and technology managers no prior LLM experience required Examples use simple well annotated Python code

About the Author Abhinav Kimothi is a seasoned data and AI professional He has spent over 15 years in consulting and leadership roles in data science machine learning and AI and currently works as a Director of Data Science at Sigmoid

Artificial Intelligence in Architecture and the Built Environment Michal Sourek, 2025-01-22 Imagine if every architect had an apprentice who could consistently observe and understand their intentions take over routine tasks and monitor technical environmental and economic constraints This apprentice would continually improve freeing the architect to concentrate on truly creative work This book outlines a plan to turn this vision into reality It evaluates the development of artificial intelligence from its inception to the present focusing on the last two decades of applying AI in architectural design and planning the current state of architectural practice is also examined Integrating architecture computer science AI robotics economics law neurobiology and philosophy the vision is built on three key premises i authentic poetic creativity that transcends parameterization and algorithmizing ii innovative learning strategies and training approaches not yet applied concerning architectural design and iii the convergence of architecture's inherent spatiality with virtual reality technology and new theories of human thinking and intelligence poised for implementation in machine learning

Pretrain Vision and Large Language Models in Python Emily Webber, Andrea Olgiati, 2023-05-31 Master the art of training vision and large language models with conceptual fundamentals and industry expert guidance Learn about AWS services and design patterns with relevant coding examples

Key Features

Learn to develop train tune and apply foundation models with optimized end to end pipelines Explore large scale distributed training for models and datasets with AWS and SageMaker examples Evaluate deploy and operationalize your custom models with bias detection and pipeline monitoring

Book Description Foundation models have forever changed machine learning From BERT to ChatGPT CLIP to Stable Diffusion when billions of parameters are combined with large datasets and hundreds

to thousands of GPUs the result is nothing short of record breaking The recommendations advice and code samples in this book will help you pretrain and fine tune your own foundation models from scratch on AWS and Amazon SageMaker while applying them to hundreds of use cases across your organization With advice from seasoned AWS and machine learning expert Emily Webber this book helps you learn everything you need to go from project ideation to dataset preparation training evaluation and deployment for large language vision and multimodal models With step by step explanations of essential concepts and practical examples you ll go from mastering the concept of pretraining to preparing your dataset and model configuring your environment training fine tuning evaluating deploying and optimizing your foundation models You will learn how to apply the scaling laws to distributing your model and dataset over multiple GPUs remove bias achieve high throughput and build deployment pipelines By the end of this book you ll be well equipped to embark on your own project to pretrain and fine tune the foundation models of the future What you will learn Find the right use cases and datasets for pretraining and fine tuning Prepare for large scale training with custom accelerators and GPUs Configure environments on AWS and SageMaker to maximize performance Select hyperparameters based on your model and constraints Distribute your model and dataset using many types of parallelism Avoid pitfalls with job restarts intermittent health checks and more Evaluate your model with quantitative and qualitative insights Deploy your models with runtime improvements and monitoring pipelines Who this book is for If you re a machine learning researcher or enthusiast who wants to start a foundation modelling project this book is for you Applied scientists data scientists machine learning engineers solution architects product managers and students will all benefit from this book Intermediate Python is a must along with introductory concepts of cloud computing A strong understanding of deep learning fundamentals is needed while advanced topics will be explained The content covers advanced machine learning and cloud techniques explaining them in an actionable easy to understand way
