The Impact Equation Chris Brogan, Julien Stanwell Smith, 2012-10-25 Anyone can write a blog post but not everyone can get it liked thirty five thousand times and not everyone can get seventy five thousand subscribers But the reason we ve done these things isn t because we re special It s because we tried and failed the same way you learn to ride a bike We tried again and again and now we have an idea how to get from point A to point B faster because

of it Three short years ago when Chris Brogan and Julien Smith wrote their bestseller *Trust Agents* being interesting and human on the Web was enough to build a significant audience But now everybody has a platform The problem is that most of them are just making noise In *The Impact Equation* Brogan and Smith show that to make people truly care about what you have to say you need more than just a good idea trust among your audience or a certain number of followers You need a potent mix of all of the above and more Use the Impact Equation to figure out what you're doing right and wrong Apply it to a blog a tweet a video or a mainstream media advertising campaign Use it to explain why a feature in a national newspaper that reaches millions might have less impact than a blog post that reaches a thousand passionate subscribers Consider the phenomenally successful British singer Adele For most musicians onstage banter basically consists of yelling Hello Cleveland But Adele connects with her audience pausing between songs to discuss a falling out with her friends or the drama of a break up Each of these moments comes off as if she were talking directly with you and you can easily relate Adele has Impact As the traditional channels for marketing selling and influencing disappear and more people interact mainly online the very nature of attention is changing The Impact Equation will give you the tools and metrics that guarantee your message will be heard

Designing for Democracy Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it In *Designing for Democracy* Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or

whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory Designing for Democracy provides blueprints for democracy in a digital age *Malort* Josh Noel,2024-09-03 As I am someone who has grown to actually like Mal rt you may doubt my taste But Josh Noel s exploration of this most maligned spirit is funny fascinating and surprisingly delicious John Hodgman comedian and author of Medallion Status Mal rt may be the worst thing you ll ever taste Known primarily for its intense bitterness the infamous Chicago liqueur has been compared to a forest fire if the forest was made of earwax Yet lurking in the horror and the mockery lies the truth of Mal rt we keep going back for more For nearly a hundred years we ve gone back Jeppson s Mal rt could have died a hundred deaths in that time Its survival wasn t always a given It also was no accident There was one man s dogged persistence One woman s patience and dedication There were cultural shifts and fortunate timing that helped transform a drink rooted in centuries old Swedish tradition into the American sensation it is today Mal rt is a story of love relationships and how one generation finds meaning where generations before did not Such transformations happen in art in history and in food and it happened to Jeppson s Mal rt Author and beer expert Josh Noel unpacks a uniquely American tale equal parts culture business and personal relationships involving secret love federal prison a David vs Goliath court battle and ultimately the 2018 sale of Jeppson s Mal rt which made Pat Gabelick a 75 year old Chicago woman who spent much of her life as a legal secretary into an unlikely millionaire Mal rt isn t just the story of one brazen liquor it is the story of modern tastes and cultural shifts Advances in Information Retrieval Jaap Kamps,Lorraine Goeuriot,Fabio Crestani,Maria Maistro,Hideo Joho,Brian Davis,Cathal Gurrin,Udo Kruschwitz,Annalina Caputo,2023-03-16 The three volume set LNCS 13980 13981 and 13982 constitutes the refereed proceedings of the 45th European Conference on IR Research ECIR 2023 held in Dublin Ireland during April 2 6 2023 The 65 full papers 41 short papers 19 demonstration papers and 12 reproducibility papers 10 doctoral consortium papers were carefully reviewed and selected from 489 submissions The accepted papers cover the state of the art in information retrieval focusing on user aspects system and foundational aspects machine learning applications evaluation new social and technical challenges and other topics of direct or indirect relevance to search Invincible #93 Robert Kirkman,2012-07-04 More secrets about Robot s and Monster Girl s time spent in the Flaxan Dimension are revealed Meanwhile in the present things go to hell and the new Invincible has to prove if he s worthy of the mantle in the face of INVASION **New Directions in Second Language Pragmatics** J. multimodal material and atypical corpus texts

Socialbots and Their Friends Robert W. Gehl, Maria

Bakardjieva, 2016-12-01 Many users of the Internet are aware of bots automated programs that work behind the scenes to come up with search suggestions check the weather filter emails or clean up Wikipedia entries More recently a new software robot has been making its presence felt in social media sites such as Facebook and Twitter the socialbot However unlike other bots socialbots are built to appear human While a weatherbot will tell you if it's sunny and a spambot will incessantly peddle Viagra socialbots will ask you questions have conversations like your posts retweet you and become your friend All the while if they're well programmed you won't know that you're tweeting and friending with a robot Who benefits from the use of software robots Who loses Does a bot deserve rights Who pulls the strings of these bots Who has the right to know what about them What does it mean to be intelligent What does it mean to be a friend *Socialbots and Their Friends* Digital Media and the Automation of Sociality is one of the first academic collections to critically consider the socialbot and tackle these pressing questions

Veale, Mike Cook, 2018-09-11 The world of Twitterbots from botdom s greatest hits to bot construction to the place of the bot in the social media universe Twitter offers a unique medium for creativity and curiosity for humans and machines The tweets of Twitterbots autonomous software systems that send messages of their own composition into the Twittersphere mingle with the tweets of human creators the next person to follow you on Twitter or to like your tweets may not be a person at all The next generator of content that you follow on Twitter may also be a bot This book examines the world of Twitterbots from botdom s greatest hits to the hows and whys of bot building to the place of bots in the social media landscape In Twitterbots Tony Veale and Mike Cook examine not only the technical challenges of bending the affordances of Twitter to the implementation of your own Twitterbots but also the greater knowledge engineering challenge of building bots that can craft witty provocative and concise outputs of their own Veale and Cook offer a guided tour of some of Twitter s most notable bots from the deadpan big_ben_clock which tweets a series of BONGs every hour to mark the time to the delightful pentametrion which finds and pairs tweets that can be read in iambic pentameter to the disaster of Microsoft s TayAndYou which learned conspiracy theories racism and extreme politics from other tweets They explain how to navigate Twitter s software interfaces to program your own Twitterbots in Java keeping the technical details to a minimum and focusing on the creative implications of bots and their generative worlds Every Twitterbot they argue is a thought experiment given digital form each embodies a hypothesis about the nature of meaning making and creativity that encourages its followers to become willing test subjects and eager consumers of automated creation Some bots are as malevolent as their authors Like the bot in this book by Veale Cook that uses your internet connection to look for opportunities to buy plutonium on The Dark Web

PROSECCOnetwork **Emo** Judith May Fathallah, 2020-11-15 For many the word emo calls to mind angsty teenagers shaggy black haircuts and skinny jeans A popular music phenomenon in the early 2000s emo is short for emotional hardcore and refers to both a music genre and a youth scene notable for its androgynous style Judith May Fathallah pushes beyond the stereotypes and social stigma to explore how online fandom has shaped the definition of emo with significant implications both for millennial constructs of gender and for contemporary fan studies First laying out the debate over what emo is Fathallah walks superfans and newcomers through the culture surrounding the genre s major bands including the emo holy trinity My Chemical Romance Fall Out Boy and Panic At the Disco Next she examines fans main mode of participation in the

emo subculture online communities such as LiveJournal Tumblr MySpace and band websites Taking a hard look at the gender politics that dominated those spaces she unearths a subculture that simultaneously defines itself by its sensitivity and resistance to traditional forms of masculinity yet ruthlessly enforces homophobic and sexist standards Fathallah demonstrates fandom's key role in defining emo as a concept and genre after 2001 with probing insight into its implications for gender constructions through popular music [Cross Stitch Crazy November 2017](#) Magazines Global, Cross Stitch Crazy November 2017 **All you need to know about Darkweb - How to access and what to look out for** John Stevenson, Beyond the familiar online world that most of us inhabit a world of Google Facebook and Twitter lies a vast and often hidden network of sites communities and cultures where freedom is pushed to its limits and where people can be anyone or do anything they want This is the world of Bitcoin and Silk Road of radicalism and pornography This is the Darkweb In this book a step by step guide will teach you how to access Darkweb [Python for Data Science For Dummies](#) John Paul Mueller, Luca Massaron, 2019-01-25 The fast and easy way to learn Python programming and statistics Python is a general purpose programming language created in the late 1980s and named after Monty Python that's used by thousands of people to do things from testing microchips at Intel to powering Instagram to building video games with the PyGame library Python For Data Science For Dummies is written for people who are new to data analysis and discusses the basics of Python data analysis programming and statistics The book also discusses Google Colab which makes it possible to write Python code in the cloud Get started with data science and Python Visualize information Wrangle data Learn from data The book provides the statistical background needed to get started in data science programming including probability random distributions hypothesis testing confidence intervals and building regression models for prediction
