Comprehensive Remote Sensing Shunlin Liang, 2017-11-08 Comprehensive Remote Sensing Nine Volume Set covers all aspects of the topic with each volume edited by well known scientists and contributed to by frontier researchers. It is a comprehensive resource that will benefit both students and researchers who want to further their understanding in this discipline. The field of remote sensing has quadrupled in size in the past two decades and increasingly draws in individuals working in a diverse set of disciplines ranging from geographers, oceanographers and meteorologists to physicists and computer scientists. Researchers from a variety of backgrounds are now accessing remote sensing data, creating an urgent need for a one-stop reference work that can comprehensively document the development of remote sensing from the basic principles, modeling and practical algorithms to various applications. Fully comprehensive coverage of this rapidly growing discipline giving readers a detailed overview of all aspects of Remote Sensing principles and applications. Contains Layered content with each article beginning with the basics and then moving on to more complex concepts. Ideal for advanced undergraduates and academic researchers. Includes case studies that illustrate the practical application of remote sensing principles, further enhancing understanding. *Comparing, Designing, and Deploying VPNs* Mark Lewis (CCIE.), 2006 A detailed guide for deploying PPTP, L2TPv2, L2TPv3, MPLS, Layer 3, AToM, VPLS and IPsec virtual private networks. Urban Infrastructure Remo Dalla Longa, 2023-03-01 The book deals with the concept of urban infrastructure and the strong evolution of globalization, in particular the driving force taken by global cities. Urban infrastructure is a constituent part of the global cities, both have a synergistic evolution. The main reference is to western global cities in the intertwining of financialization, settling and brownfield, which is a little different from the urbanization of other global cities of other non-developed countries or emerging countries. There is therefore a significant link between globalization and urban infrastructure. The occurrence of slowbalization can have consequences on urban areas' infrastructures and more generally on the different dichotomy between global city and nation. With the pandemic infectious and the post-COVID there is already a different configuration between the global city and the rest of the national territory. A driving element of the urban infrastructure and the global city has been the financialization and identification of assets within global cities. Urban infrastructure as an asset has grown considerably in the last two decades in the wake of what has already been highlighted previously for real estate. There are contiguous issues that affect the concept of urban infrastructures and they are the enormous growth of finance and the landings of this in the great cities of the world with investments that first involved Real Estate and then urban infrastructures. There has also been a technological revolution that has merged the ubiquitous technological infrastructure with other more traditional components of the infrastructure, even apparently recent themes such as smart cities come from this evolutionary trend and merge with urban infrastructures. The theme of smart cities if properly interpreted gives strength to the concept of urban infrastructure. **International Directory of Software**, 1982

Consent of the People David Kemp, 2022-10-18 *Consent of the People: Human Dignity through Freedom and Equality* 1966 2022 explores how Australia's founding Enlightenment ideals were shaped into a unique national liberalism embodied in liberal democratic institutions, political parties, and shared values. Despite intense partisan loyalties, conservative and radical resistance, and a politics of unequal power and influence, inequality was addressed and personal freedom strengthened. This final book in the landmark five-volume *Australian Liberalism* series examines the place of liberal ideas in governments from Harold Holt to Scott Morrison. It shows how reform urgency led to the nation's greatest political crisis in 1975, how prime ministers Fraser and Hawke struggled to manage an economy dominated by powerful union, business, and global interests, how during twenty-four crucial years Hawke, Keating, and Howard led one of the nation's greatest reform eras, and how social reform continued despite the leadership instability of the post-Howard era. David Kemp assesses political parties as the instruments of reform and the difficulties of achieving reform in the public interest, highlighting the dangers of factionalism and loss of purpose. He examines how an international revival of liberal thought and rising levels of education revolutionised Australian society and politics, creating a moral and moralistic ruling class. In a remarkable half-century, Australians strove with growing success to achieve their dreams.
