Essentials of Consumer Behavior Debra L. Stephens, 2016-10-26 Essentials of Consumer Behavior offers an alternative to traditional textbooks for graduate students. Shorter than competing books but no less rigorous, it includes unique material on vulnerable consumers and ethics. Balancing a strong academic foundation with a practical approach, Stephens emphasizes that consumer behavior does not simply equate to buyer behavior. She examines the thoughts, feelings, and behaviors that shape consumers' attitudes and motivations in relation to brands, products, and marketing messages. Providing a concise guide to the discipline, the author covers key themes such as vulnerable consumers, new technologies, and collaborative consumption. The book is supported by a rich companion website offering links to videos and podcasts, surveys, quizzes, further readings, and more. It will be a valuable text for any graduate student of consumer behavior or marketing, as well as any interested consumers.

Digital Manifesto Francois Zielemans, 2018-01-01 Business and IT executives are increasingly working side by side in an effort to strengthen their company's strategic advantages, capture new markets that are often digital, and realize value from disruptive technologies. Many professionals responsible for defining and executing IT strategy are being continuously pressured to digitize their company's business model and become more agile, innovative, and proactive, yet they lack the knowledge and guidance to achieve results. This powerful guide from IT executive and digitalization consultant Francois Zielemans provides a set of principles and practices that will help executives connect business and IT teams by adopting a shared belief system and business model, converge or even fuse business and technology life cycles, and increase the agility and effectiveness of the entire digital value chain. Digital Manifesto provides a road map for turning potential value into realized value.

Proceeding of the International Conference on Computer Networks, Big Data and IoT (ICCBI - 2018) A. Pasumpon Pandian, Tomonobu Senjyu, Syed Mohammed Shamsul Islam, Haoxiang Wang, 2019-07-31 This book presents the proceedings of the International Conference on Computer Networks, Big Data, and IoT (ICCBI 2018) held on December 19-20, 2018, in Madurai, India. In recent years, advances in information and communication technologies (ICT) have collectively aimed to streamline the evolution of internet applications. In this context, increasing the ubiquity of emerging internet applications with an enhanced capability to communicate in a distributed environment has become a major need for existing networking models and applications. To achieve this Internet of Things (IoT) models have been developed to facilitate a smart interconnection and information exchange among modern objects, which plays an essential role in every aspect of our lives. Due to their pervasive nature, computer networks and IoT can easily connect and engage effectively with their network users.

This vast network continuously generates data from heterogeneous devices creating a need to utilize big data which provides new and unprecedented opportunities to process these huge volumes of data This International Conference on Computer Networks Big Data and Internet of Things ICCBI brings together state of the art research work which briefly describes advanced IoT applications in the era of big data As such it offers valuable insights for researchers and scientists involved in developing next generation big data driven IoT applications to address the real world challenges in building a smartly connected environment
