Innovation Management in Practice Frédéric Sauzet, 2025-11-18 In an increasingly competitive environment, companies are constantly on the lookout for new avenues of growth and new markets. In a technology driven race to the front, they are approaching the era of intensive innovation with varying degrees of anxiety. They invest more in the design of new products and partnerships with emerging companies. They encourage the acquisition of new skills in innovation and creativity. They now consider all sources of innovation on the same level: those traditionally derived from technology, as well as those originating in management design, product life cycles, business models, or the satisfaction of social needs. While incremental innovations can be improved using stabilised processes, the search for breakthrough innovation is more a matter of specific practices. The ability to set up a regular innovation machine is a major challenge for organisations today. The ISO 56001 Innovation Management System standard meets this challenge. ISO 56001 provides requirements and guidance for establishing, implementing, maintaining, and improving an innovation management system. This standard aims to enhance an organisation's ability to innovate consistently and successfully. This practical book, with its pedagogical approach and practical cases, will guide readers step by step in their innovation journey. The book highlights the importance of this Innovation management system (IMS) standard and explains the importance of ISO 56001, as well as providing case studies and examples of innovative companies. A compendium of original and unprecedented tools to transform any organisation into a high performance innovation machine is also included. *Demystifying Behavioral Finance* Kok Loang Ooi, 2025-02-25 This book provides a thorough examination of behavioural finance, charting its development from foundational theories to contemporary applications and future directions.
