The Changing Governance of the Sciences Richard Whitley, Jochen Gläser, 2008-03-20 This book arose from a conversation between Lars Engwall and Richard Whitley during the 2003 European Group for Organization Studies Colloquium in Copenhagen about important topics for future research We agreed then and this has been amply confirmed by subsequent events that the proliferation of research evaluation schemes especially in Europe was an important feature of the changing relationships between the state universities and scientific research more generally which needed systematic and

comparative analysis With the support of the Bank of Sweden Tercentenary Foundation this discussion led to workshops in Uppsala and Manchester involving colleagues from Australia Germany and the Netherlands at which the main framework for such an analysis was developed This framework then formed the basis for the conference at Bielefeld in 2005 at which earlier versions of most of the papers in this volume were presented and extensively discussed We are very grateful for the support of the PRIME network of the European Commission and the Max Planck Institute for the History of Science for this conference as well as the invaluable efforts of Peter Weingart of the University of Bielefeld We are also greatly indebted to the members of the Editorial Board who commented on various drafts of these papers as well as to Aant Elzinga Stefan Kuhlmann Philippe Laredo Arie Rip and Nic Vonortas who acted as referees The Publishers Weekly ,2008 **Business Week** ,2000

Metcalf,1999 We explore the effects of environmental taxes that imprecisely target pollution A review of actual policies indicates few if any examples of a true tax on pollution More typically environmental taxes target an input or output that is correlated with pollution We construct a simple analytical general equilibrium model to calculate the optimum tax rate on the input of the polluting industry in terms of key behavioral parameters and we compare this imprecisely targeted tax to an ideal tax on pollution Finally we consider incremental tax reforms such as a change in either tax from some pre existing level

Using a utility based money metric measure of welfare we examine the losses that arise from not taxing pollution directly. With no existing tax under our plausible parameters the welfare gain from an output tax is less than half the gain from an emissions tax.

Tax Policy and Consumer Spending Katsunori Watanabe, Takayuki Watanabe, Tsutomu Watanabe, 1999. This paper studies the extent to which the impact of tax policy on consumer spending differs between temporary and permanent as well as anticipated and unanticipated tax changes. To discriminate between them we use institutional information such as legal distinction between temporary and permanent tax changes as well as timing of policy announcement and implementation. We find that the impact of temporary changes is significantly smaller than the impact of permanent changes. We also find that more than 80 per cent of Japanese consumers including those who distinguish between temporary and permanent tax changes respond to tax changes at the time of their implementation and not at the time of a policy announcement. We suggest an interpretation that these consumers follow a near rational decision rule.

Violating the Law of One Price Charles Engel, John H. Rogers, 1999. We use new disaggregated data on consumer prices to determine why there is variability in prices of similar goods across U.S. cities. We address questions similar to those that have arisen in the international context: is this variability purely a result of market segmentation or do sticky nominal prices play a role? We also examine how the degree of tradability of a good influences price variability. Surprisingly we find that variability is larger for traded goods. We attribute this finding to greater price stickiness for non-traded goods. Distance between cities accounts for a significant amount of the variation in prices between pairs of cities. But we also find that nominal price stickiness plays an even more significant role.

Japan's Big Bang and the Transformation of Financial Markets Takatoshi Itō, Michael Melvin, 1999. A first step in the big bang markets was the deregulation of the foreign exchange market on April 1, 1998. This paper examines how the bid-ask spread and conditional volatility in the yen-dollar foreign exchange market changed around the time of the deregulation. Intra-day data are analyzed with the following results: 1. Holding constant the effects of volume and volatility the deregulation was associated with a convergence of Japanese quoted spreads toward those of other banks. 2. Modeling the persistence in volatility reveals that deregulation lowered conditional volatility.

Size and Growth of Japanese Plants in the United States Bruce A. Blonigen, KaSaundra Tomlin, 1999. Using a unique database on all Japanese manufacturing plants in the United States we examine the relationship between plant size and growth for these foreign-owned plants. These plants' average sizes are three times larger than comparable U.S. plants and experienced 30 percent growth from 1987 through 1990 while U.S. average plant sizes declined over the same period. Our estimates strongly reject Gibrat's Law for these plants and suggest that smaller plants grow faster. We also find learning affects plant level growth. Newer plants grow quicker and previous investments by the parent firm mean slower growth particularly for automobile-related plants. Both are consistent with inexperienced firms growing faster as they learn.
