

A Typical Year in the NFL

The National Football League, commonly known as the NFL, is the United States' top level American football competition. The league has thirty-two teams and its schedule usually runs from 10 to 18 weeks, and usually has games on every regular season. Some of these matchups are now also played in other parts of the world, such as Mexico, the United Kingdom, Germany and South America. In order to keep the league running smoothly, games and events take place throughout the year.

10

Every year, a total census begins in September and runs for 10 months.

Planning for this year's month-long information is collected by schedule readers as early as the spring to help with our multiple sites and locations.

100

Thousands of computers are used to create different matching algorithms before one is picked that works the best.

Throughout the regular season, each team will play numerous games, most of them take place on Tuesday afternoons (Tues 90). You will have one 'bye week' (when they don't play a game) included in their schedule as players can not work another one more factor.

100

In January, the regular season reaches its end and is followed by the playoffs, when the best teams take part in playoff and championship games. However, the league's highlight and its final game is Super Bowl, which usually takes place in February.
