Animals

Read the paragraph below and answer the questions on the next page.

Animals are the most interesting creatures that we know of. They are everywhere. Some live in the water, some on land, and some in the air. They are all different in size, shape, and color. Some are big and strong, while others are small and weak. Some are fast and agile, while others are slow and clumsy. Some are friendly and gentle, while others are fierce and dangerous. There are so many different kinds of animals, and each one has its own special way of life.

Animals are also very intelligent. Some can learn to do tricks, and some can even use tools. They can communicate with each other in many different ways, such as by making sounds, using body language, or even by touching. Some animals are very social and live in groups, while others are solitary and live alone. All animals have their own unique characteristics that make them special.

Animals are an important part of our world, and we should all take care of them. We should protect their habitats and make sure they have enough food and water to live. We should also be kind to them and not hurt them unnecessarily. By taking care of animals, we can help make our world a better place for everyone.
