Werner, Patrik Åker, Greg Goldenzwaig, 2017-08-24 **Streaming Music** examines how the Internet has become integrated in contemporary music use by focusing on streaming as a practice and a technology for music consumption. The backdrop to this enquiry is the digitization of society and culture where the music industry has undergone profound disruptions and where music streaming has altered listening modes and meanings of music in everyday life. The objective of *Streaming Music* is to shed light on what these transformations mean for listeners by looking at their adaptation in specific cultural contexts but also by considering how online music platforms and streaming services guide music listeners in specific ways. Drawing on case studies from Moscow and Stockholm and providing analysis of Spotify, VK and YouTube as popular but distinct sites for music, *Streaming Music* discusses through a qualitative cross cultural study questions around music and value, music sharing, modes of engaging with music and the way that contemporary music listening is increasingly part of mobile, automated and computational processes. Offering a nuanced perspective on these issues, it adds to research about music and digital media, shedding new light on music cultures as they appear today. As such, this volume will appeal to scholars of media sociology and music with interests in digital technologies.

Sharing Matthew David, 2017-09-05 Today's economic system premised on the sale of physical goods does not fit the information age in which we live. The capitalist order requires the maintenance of an artificial scarcity in goods that have the potential for near infinite and almost free replication. The sharing of informational goods through distributed global networks, digital libraries, file sharing, live streaming, free software, free access publishing, the free sharing of scientific knowledge and open source pharmaceuticals not only challenges the dominance of a scarcity based economic system but also enables a more efficient, innovative, just and free culture. In a series of seven explorations of contemporary sharing, Matthew David shows that in each case sharing surpasses markets, private ownership and intellectual property rights in fostering motivation, creativity, innovation, production, distribution and reward. In transforming the idea of an information economy into an information society, sharing connects struggles against inequality and poverty in developed and developing countries. Challenging taken for granted justifications of the status quo, *Sharing* debunks the tragedy of the commons and makes the case for digital network sharing as a viable mode of economic counterpower, prefiguring a post capitalist society.
