Harvest of research outcomes to confirm achievement of the millennium development goals Simeon O. Jekayinfa, 2017-09-15 In 2000 the leaders of member states of the United Nations adopted the Millennium Declaration which

set out a series of clear commitments goals and targets to achieve Human Development These ambitious goals were subsequently refined into eight Millennium Development Goals MDGs designed to provide a framework for accountability donor coordination and resource mobilization The MDGs are Eradicate extreme poverty and hunger achieve universal primary education promote gender equality and empower women reduce child mortality improve maternal health combat HIV AIDS malaria and other diseases ensure environmental sustainability and develop a global partnership for development The first seven of these Goals are concerned with outcomes identifying the progress towards certain standards of human well being and decent living which should be achieved globally and nationally by 2015 The eighth Goal is concerned with relationships identifying various aspects of a global partnership for development which must be forged to support the realization of these poverty reduction human development and environmental sustainability standards The MDGs provide opportunities to start working from real life development problems Addressing these problems requires multidisciplinary approaches that combine the natural sciences the life sciences and technical approaches with social science approaches The challenge is to integrate social economic political and institutional concerns into research strategy To be able to achieve this there is a need to establish a linking pin between research policy and practice in Nigeria The aim of such a linking pin would be to synthesize research outcomes on specific MDGrelated topics and to translate these into implications for policy and decision making through easily accessible gathering where individual stakeholders can air their views The articles contained in this book address research outcomes from stakeholders Sociologists Economists Agronomists Agricultural Engineers Civil Engineers Environmental Scientists and Engineers Geographers Geologists Microbiologists Medical Practitioners Policy Makers Educationists etc to confirm achievement of Millennium Development Goals in Nigeria and other neighboring countries

Handbook of Gasification Technology James G. Speight, 2020-04-14 Gasification is one of the most important advancements that has ever occurred in energy production Using this technology for example coal can be gasified into a product that has roughly half the carbon footprint of coal On a large scale gasification could be considered a revolutionary development not only prolonging the life of carbon based fuels but making them greener and cleaner As long as much of the world still depends on fossil fuels gasification will be an environmentally friendlier choice for energy production But gasification is not just used for fossil fuels Waste products that would normally be dumped into landfills or otherwise

disposed of can be converted into energy through the process of gasification. The same is true of biofeedstocks and other types of feedstocks, thus making another argument for the widespread use of gasification. The Handbook of Gasification Technology covers all aspects of the gasification in a one-stop shop from the basic science of gasification and why it is needed to the energy sources, processes, chemicals, materials, and machinery used in the technology. Whether a veteran engineer or scientist using it as a reference or a professor using it as a textbook, this outstanding new volume is a must-have for any library.
