French Thought and Literary Theory in the UK Irving Goh, 2019-10-21 This collection presents a sort of counter history or counter genealogy of the globalization of French thought from the point of view of scholars working in the UK While the dominating discourse would attribute the US as the source of that globalization particularly through the 1966 conference on the Languages of Criticism and the Sciences of Man at Johns Hopkins University this volume of essays serves as a reminder that the UK has also been a principal motor of that globalization The essays take into account how French thought and literary theory have institutionally taken shape in the UK from the 70s to today highlight aspects of French thought that have been of particular pertinence or importance for scholars there and outline how researchers in the UK today are bringing French thought further in terms of teaching and research in this twenty first century In short this volume traces how the country has been behind the reception and development of French thought in Anglophone worlds from the late 70s to the present

Freud's statements on the penis envy theory Primary attention is paid to the theory of phallogentrism which can be seen as one of the main reasons for Cixous's writings For a better understanding of this term the concept of logocentrism is also explained as well Logocentrism can be seen as a pillar of the theory of phallogentrism and therefore it deserves to be mentioned at this point In the second part we deal with the question of what is actually meant by women's writing Furthermore we will analyze which role the female body and sexuality plays in this context This excursion is highly interesting as it is crucial for the understanding of her concept Since the female body is considered a key for women to resist masculinist thinking and hence the systematic repression of women Apart from that we try to show whether features of *Écriture Feminine* are evident in *The Laugh of the Medusa* Moreover a different viewpoint on Cixous's theory is shown in the chapter Criticism in which arguments for and against her theory are shown In point five Conclusion the main aspects of this paper are summed up When writing this paper the main source of information were essays on women's writing and French feminist writing dating from 1987 to 1986 Besides secondary literature on literary and cultural theory as well as feminist practice and poststructuralist theory were used Recent research on Cixous's work however could not be found The only source dealing particularly with her writings dates from 1991

Coherence and the Textual Function in "The Curious Incident of the Dog in the Night-time" Marieke Jochimsen, 2010-04 Seminar paper from the year 2008 in the subject English Language and Literature Studies Linguistics grade 2.0 University of Münster Englishes Seminar course Systemic Functional Linguistics language English abstract Wherever we look we see language constituting the world not just reflecting it For instance the words for colours make a reality they don't just name things which are there the spectrum isn't divided into seven primary colours all the colours merge into one another According to structural linguistics by using language we are not reflecting a given reality but are rather construing one Systemic functional grammar developed by M. A. K. Halliday states just this construal feature of language as well That language functions to make meanings and not to only refer to the outside world But furthermore elaborates on how a text makes those meanings It focuses therefore on the functional description of language The basic

assumption is that language use is always functional people do not just talk or just write ² but rather any use of language serves a specific purpose namely to make meanings The primary concern of systemic functional linguistics can therefore be summed up under the questions How is language structured for use ³ How does it make meanings According to Halliday language makes meanings on three different levels simultaneously on the experiential level because it represents experience on the interpersonal level because language is used to interact with each other and on the textual level because we organize our message somehow This research paper will focus on the textual metafunction of language which is the theory of the clause being organized as a message The aim is to show that text itself construes the context by involving meaningful choices concerning what to put in thematic position and by means of cohesion Thus context is not only created through coherence i e the outside knowl
