Productive Struggle Inspiring Math Perseverance

Time Frame: 30 min

Lesson Overview: Many children and adults believe that they can't do math. But every student CAN do math, especially when we provide opportunities for positive and productive struggle.

Lesson Objectives:

Students will be able to practice perseverance in (potentially) challenging situations.

Keywords:

Perseverance, productive struggle

Materials Needed:

- Math problems from your textbook

DO:

Model Positive Productive Struggle

- When working on a math problem (easy or difficult) explain your thinking and how to solve the problem. This helps students make sense of what they're doing.
- Model your reasoning using number lines, arrays, skip counting, and more. This helps students understand that there is more than one way to get to any answer—right or wrong!
- Invite mistakes and have students correct them.
- Deliberately get something wrong so that they can correct you and prove their answer.

Praise Those That Finish Last

- Adversity makes people wiser. In a math sense, this means if you get something wrong, try again. It's the journey to understanding that's most powerful. In my classroom, I praise students who are the last ones to finish their assignment or assessment, not the first. Why? Because I know these were the students that took their time, explained their thinking, and wanted to exceed my expectations. They possessed the mindset that they would do their best, not give up, and make their teacher proud.
