Civic Engagement in Australian Democracy Sarah Murray, Lachlan Umbers, 2025-05-13 The Australian democratic system has long been regarded as one of the most stable and predictable in the world with an entrenched two party duopoly compulsory voting ensuring high levels of electoral participation and relatively high levels of satisfaction with the democratic process Yet the ways Australians engage with and participate in their democracy have shifted substantially in recent times While a record proportion of Australians are now on the electoral roll less than 1% belong to a political party and the share of Australians that have always voted for the same party in Federal elections has declined from 72% in 1967 to 37% in 2022 Turnout in the 2022 Federal Election fell below 90% for the first time since the introduction of compulsory voting in 1924 Over 50% of voters cast their ballots early in 2022 up from around 10% in 2004 The advent of social media has afforded Australians a range of opportunities for political engagement but has also given rise to serious concerns surrounding the dissemination of misinformation And Australians

have also recently been afforded several historically rare opportunities for direct participation in the lawmaking process particularly the 2017 same sex marriage plebiscite and the 2023 referendum on the Aboriginal and Torres Strait Islander Voice to Parliament These developments give rise to a wide range of deep difficult questions for Australian democracy many of which have been under explored What for instance does the failure of the referendum on the Aboriginal and Torres Strait Islander Voice to Parliament mean for Australian democracy What sorts of opportunities ought to be afforded to Australians for direct participation in government How might climate change impact Australian democracy in the coming decades How might the rise in early voting impact the character of Australian democracy What opportunities do Australians have for engagement in civic life and what obstacles do they face in exercising them This edited collection brings together specialists in the democratic process to consider such questions alongside many others Moreover the collection is uniquely interdisciplinary insofar as the contributors are drawn from a diverse range of fields law philosophy political science and sociology The chapters each help bring us a broader understanding of civic participation in Australian democracy in order that we might evaluate the status quo and gauge where it might be headed in the future

Governing Cross-Border Data Flows Svetlana Yakovleva, 2024-02-27

Governing Cross Border Data Flows explores how the European Union can simultaneously reconcile and pursue two important legal and policy objectives namely protecting fundamental rights guaranteed under the EU Charter of Fundamental Rights EU Charter concerning privacy and personal data while also maintaining and developing a binding rules based global trading system to ensure appropriate access to foreign digital markets for EU businesses The book demonstrates a significant conflict between international trade law and European data privacy law when it comes to the governance of cross border flows of personal data To resolve the tensions caused by this clash the book proposes concrete and detailed ways to ameliorate the situation from both ends international trade and personal data protection specifically through reforms of both international trade and chapter V of the General Data Protection Regulation GDPR To explain how such reforms could be effectuated Yakovleva examines the role of discourse in the evolution of trade law in the last two decades The book also paves the way for the further research necessary to design a fully fledged reform proposal of the EU

framework for the transfer of personal data outside the European Economic Area **Battlefield Cyber** William J Holstein, Michael McLaughlin, 2023-08-15 The United States is being bombarded with cyber attacks From the surge in ransomware groups targeting critical infrastructure to nation states compromising the software supply chain and corporate email servers malicious cyber activities have reached an all time high Russia attracts the most attention but China is vastly more sophisticated They have a common interest in exploiting the openness of the Internet and social media and our democracy to erode confidence in our institutions and to exacerbate our societal rifts to prevent us from mounting an effective response Halting this digital aggression will require Americans to undertake sweeping changes in how we educate organize and protect ourselves and to ask difficult questions about how vulnerable our largest technology giants are If we are waiting for a Cyber 9 11 or a Cyber Pearl Harbor we are misunderstanding how our adversaries wage cyber warfare This is a timely and critically important book No other book has analyzed the threat of cyber warfare with the depth and knowledge brought to the subject by the authors It has now become a cliché to argue that a whole of government or whole of society response is necessary to respond to this crisis but that concept has never been more important It will take many years and billions of dollars to even begin to secure our IT systems and prevent the slow rot that is destroying America Using language that the layman can understand we wish to educate Americans about what has happened and inspire them to seek solutions
