

Chapter 1: Industrial Organization: What, How and Why?

Problem 1

Many examples imperfectly competitive markets are possible. Common ones include: (1) Automobiles, (2) Beer, (3) Telephone/Telecommunications, (4) Jet Aircraft, (5) Patented Pharmaceuticals, and (6) Computer Operating Systems. Large entry costs, scale economies, network effects and government regulations all play a role in these examples.

Problem 2

In a perfectly competitive market, each agent is a price taker. That is, decisions of individual firm and / or consumer do not affect the market price or environment. Therefore, there is no room for strategic behavior in a perfectly competitive market.

Problem 3

In general, the Clayton Act was designed to prevent monopoly "in its incipency" by making explicitly illegal a number of business practices. In particular, Section 2 prevents strategic manipulations of the upstream / downstream market by a firm with market power. Under Section 2 of the Clayton Act, it is illegal to "discriminate in price between different purchasers of commodities of like grade and quality". Section 7 was passed to prevent anti-competitive mergers.

Problem 4

If higher concentration leads to higher worker productivity, then industrial concentration can lower production cost, and therefore, horizontal mergers *may* improve economic efficiency.

Problem 5

Market dominance by one firm may be due to the firm's better performance, higher efficiency etc. Price fixing, however, does not indicate higher efficiencies for the participating firms. It simply hurts the consumers and reduces overall welfare.

Industrial Organization Lynne Pepall, Dan Richards, George Norman, 2014-01-28 Pepall's Industrial Organization Contemporary Theory and Empirical Applications 5th Edition offers an accessible text in which topics are organized in a manner that motivates and facilitates progression from one chapter to the next. It serves as a complete but concise introduction to modern industrial economics. The text uniquely uses the tools of game theory, information economics, contracting issues, and practical examples to examine multiple facets of industrial organization. The fifth edition is more broadly accessible, balancing the tension between making modern industrial analysis accessible while also presenting the formal abstract modeling that gives the analysis its power. The more overtly mathematical content is presented in the Contemporary Industrial Organization text aimed at the top tier universities, while this Fifth Edition will be less mathematical, aimed at a wider range of four-year colleges and state universities. **Review of Industrial Organization**, 2004

Environmental Problems in an Urbanizing World Jorge E. Hardoy, Diana Mitlin, David Satterthwaite, 2013-11-05 New edition of Environmental Problems in Third World Cities. Cities in Africa, Asia, and Latin America contain some of the world's most life and health threatening human environments. Environment-related diseases and injuries cause millions of preventable deaths each year. In many squatter settlements, children are 40 to 50 times more likely to die before the age of five than they would be in Europe or North America, and most such deaths are environment-related. Many cities also cause serious environmental degradation to their surroundings and increasingly contribute to global warming. This updated and much expanded edition of the classic Environmental Problems in Third World Cities describes environmental problems and their effect on human health, local ecosystems, and global cycles. It points to the political causes that underpin many of these problems, including ineffective, unaccountable governments and aid agencies' reluctance to work with the urban poor. It also highlights innovative solutions such as high quality, low cost homes and neighbourhoods developed by urban poor groups working with local non-governmental organizations, Local Agenda 21s developed by municipal governments in partnership with community organizations. In their analysis, the authors show that cities can meet sustainable development goals. There are practical, affordable solutions to their environmental problems, but most of these depend on more competent and accountable city governments and on more support for low income households and their organizations. The book also outlines the changes needed in international aid agencies to support this. PRAISE FOR THE FIRST EDITION: It's rare to encounter a work as authoritative and accessible as this. It is a mine of useful information from cities in every corner of the Third World, which does not shy away from the immensity of the problems but says as much about the solutions to them as about the problems themselves. Jonathon Porritt. Well written and very accessible. The Geographical Journal. Of value to students, teachers, practitioners, policy makers, and aid agencies. Third World Planning Review. A valuable resource for understanding the underlying problems, this book offers practical alternatives. Cities International. **Canadian Periodical Index**, 1995

Environmental Problems in an Urbanizing World Jorge Enrique Hardoy, Diana Mitlin, David Satterthwaite, 2001

Updated and much expanded edition of the authors 1992 classic *Environmental Problems in Third World Cities*

Comprehensive account of the health and life threatening environmental conditions in which a growing proportion of the world's people live Ideal as a textbook and for professionals and interested general readers 1st edition widely adopted on urban geography development studies environmental courses Most of the world's urban population and most of the large and rapidly growing cities are in developing countries Often poorly governed their conditions produce millions of preventable deaths and extensive disease This book describes these cities environmental problems and how they affect health local ecosystems and global cycles It analyzes the causes the failure of governments to supply clean water and implement existing measures or land owning structures that marginalize the poor It also highlights the innovative ways in which problems are being tackled showing solutions are available and the action needed by cities local governments and community organizations
