The better you can cast the more you'll enjoy fly fishing. With good casting technique you can place the fly where you want it effortlessly and with precision and grace even when wind or obstructions conspire against you. In *Master the Cast* George V. Roberts Jr., a lifelong fly fisher and sought-after instructor, walks you through a course that breaks the complicated mechanics into a few simple components. Then, with the help of hundreds of photos and illustrations, he shows you how to master these in seven concise lessons, including The Roll Cast, which builds your rod arm mechanics; how the hand, wrist, forearm, and upper arm function to make the rod work; The Pick Up and Lay Down Cast, which forms the foundation of all straight line casting; False Casting, which allows you to keep the fly airborne for several strokes before delivering it; plus Shooting Line Casting in All Planes, Drift and Follow Through, Off Vertical Casting, and an advanced lesson on Hauling. *Master the Cast* is an indispensable resource for all fly fishers, beginner to advanced, that will have you casting flies with confidence, precision, and consistency after only a few hours practice. Most fly fishers cast mechanically without understanding the mechanics of the cast. But understanding precisely what is going on and why is what makes a good caster into an excellent one.
