Perilous Passage Mankind And The Global Ascendancy Of Capital World Social Change:

Perilous Passage Amiya Kumar Bagchi, 2005 In this innovative and ambitious global history distinguished economic historian Amiya Kumar Bagchi traces the global history of human change and survival under the sway of capitalism since the voyages of Columbus Writing with extraordinary range and depth he offers a critical analysis of the history and human costs and consequences of development in Europe and North America and in major regions such as India China Japan and Africa Bagchi critically characterizes the emergence and operation of capitalism as a system driven by wars over resources and markets rather than one that genuinely operates on the principle of free markets His unflinching examination of the human toll in the periphery as well in the core nations includes not only economic processes and issues of inequality within and among nations but also the intertwining of economics and war making on a world scale Bagchi s compelling vision will change the ways in which we think about many of the largest issues in the world history and development over the past 500 years

The European Union and Global Social Change József Böröcz, 2009-09-10 This book examines just what the European Union is in the context of the ongoing structural transformation of the global system The author develops an integrated approach to global transformations drawing on geopolitics political geography international relations economics economic and political history political economy and macro sociology to discuss how this supra state organisation that shares and pools the sovereignty of some of the wealthiest states of the modern world makes sense The book Interprets the ongoing transformation of west European public authority in the context of the global geopolitical economy of competition cooperation and conflict Examines the consequences of west European integration for the global system in a longue dur e perspective developing a new geopolitical dialect within world systems analysis sharpening some of the conceptual tools developed by its paradigm setters Develops a new conceptualization for the EU s global geopolitical strategy which the author describes this strategy as the elasticity of size Developing a deeper understanding of global social change and west European strategies of global advantage maintenance and power management this book will be of interest to students and scholars of European Politics International Politics International Relations Theory and Globalization Studies

War Is Hell Charles Douglas Lummis, 2023-03-03 War is Hell is a study of the philosophy of war and peace ranging critically from ancient peace thinking to today The author uses a Socratic method focused on political philosophy rather than on cultural or psychological aspects of war and peace making The book is not a treatise on ethics but rather an analysis of some aspects of the nature of war and peace This book is a study of war and by extension peace from the standpoint of political theory For all those who think there is too much war and to deal with that we need to search for new ways of thinking

Peasants and Globalization A. Haroon Akram-Lodhi, Cristóbal Kay, 2012-08-21 In 2007 for the first time in human history a majority of the world s population lived in cities However on a global scale poverty overwhelmingly retains a rural face This book assembles an unparalleled group of internationally eminent scholars in the field of rural development and social change in order to

explore historical and contemporary processes of agrarian change and transformation and their consequent impact upon the livelihoods poverty and well being of those who live in the countryside The book provides a critical analysis of the extent to which rural development trajectories have in the past and are now promoting a change in rural production processes the accumulation of rural resources and shifts in rural politics and the implications of such trajectories for peasant livelihoods and rural workers in an era of globalization Peasants and Globalization thus explores continuity and change in the debate on the agrarian question from its early formulation in the late 19th century to the continuing relevance it has in our times including chapters from Terence Byres Amiya Bagchi Ellen Wood Farshad Araghi Henry Bernstein Saturnino M Borras Ray Kiely Michael Watts and Philip McMichael Collectively the contributors argue that neoliberal social and economic policies have in deepening the market imperative governing the contemporary world food system not only failed to tackle to underlying causes of rural poverty but have indeed deepened the agrarian crisis currently confronting the livelihoods of peasant farmers and rural workers This crisis does not go unchallenged as rural social movements have emerged for the first time on a transnational scale Confronting development policies that are unable to reduce let alone eliminate rural poverty transnational rural social movements are attempting to construct a more just future for the world s farmers and rural workers *Journal of Economic Literature* ,2006-06 **The Political Economy of Global Warming** Del

Weston,2014-04-11 Humanity is facing an unprecedented global catastrophe as a result of global warming This book examines the reasons why international agencies together with national governments are seemingly unable to provide real and binding solutions to the problems The reasons presented relate to the existing dominant global economic structure of capitalism as well as the fact that global warming is too often seen as an isolated problem rather than one of a suite of exceptional converging and accelerating crises arising from the global capitalist political economy This book adopts a political economy framework to address these issues It accepts the science of global warming but challenges the predominant politics and economics of global warming To illustrate the key issues involved the book draws on South Africa building on Samir Amin s thesis that the country represents a microcosm of the global political economy By taking a political economy approach the book provides a clear explanation of the deep and pervasive problem of the denial which fails to acknowledge global warming as a systemic rather than a market problem The book should be of interest to students and scholars researching climate change environmental politics environmental and ecological economics development studies and political economics Remaking Scarcity Costas Panayotakis,2011-09-12 The dominant schools of neoclassical and neoliberal economics tell us that material scarcity is an inevitable product of an insatiable human nature Against this Costas Panayotakis argues that scarcity is in fact a result of the social and economic processes of the capitalist system The overriding importance of the logic of capital accumulation accounts for the fact that capitalism is not able to make a rational use of scarce resources and the productive potential at the disposal of human society Instead capitalism produces grotesque

inequalities and unnecessary human suffering a toxic consumerist culture that fails to satisfy and a deepening ecological crisis Remaking Scarcity is a powerful challenge to the current economic orthodoxy It asserts the core principle of economic democracy that all human beings should have an equal say over the priorities of the economic system as the ultimate solution to scarcity and ecological crisis

Fight Back A. A. Choudry, 2009 Displacement of people migration immigration and the demand for labour are connected to the fundamental restructuring of capitalism and to the reduction of working class power through legislation to free the market from state interference The result is that a large number of immigrant and temporary foreign workers face relentless competition and little in the way of protection in the labour market Globally and in Canada immigrant workers are not passive in the face of these conditions they survive and fight back This book documents their struggles and analyzes those struggles within the context of neoliberal globalization and international and national labour markets Fight Back grew out of collaboration between a group of university affiliated researchers activists and the Immigrant Centre in Montreal The book shares with us the experience of immigrant workers in a variety of workplaces It is based on the belief that the best kind of research comes from people s lived experiences and consequently tells it how it really is Book Jacket
