Essentials of Anesthesia for Infants and Neonates Mary Ellen McCann, 2018-02-22 It is estimated that 1.5 million infants undergo surgery and anesthesia in the USA each year. However, there are serious concerns within the pediatric anesthesia community regarding the safety of anesthesia in infants and children. It focuses on the first year of life, the time when anesthesia mortality and morbidity is highest. Chapters are illustrated in color throughout and include sections on newborn physiology for anesthetic management, specific procedures, pain management, and topics such as regional anesthesia and sedation.
