Generative AI in Education Ilaria Torre, Diego Zapata-Rivera, Chien-Sing Lee, Antonio Sarasa-Cabezuelo, Ioana Ghergulescu, Paul Libbrecht, 2024-12-24 In the field of education there is a growing interest in the use of Generative Artificial Intelligence to reshape the educational landscape Led by our esteemed Associate Editors Dr Zapata Rivera Prof Torre and Review Editors Profs Lee Sarasa Cabezuelo Libbrecht Dr Ghergulescu this editorial initiative aims to investigate the

transformative potential of Generative AI in various aspects of education By leveraging machine learning models these intelligent systems extract useful insights from vast amounts of data making them capable of delivering highly individualized content They can analyze a learner's proficiency level learning style and pace and then tailor the study material accordingly Whether a learner prefers visual aids textual content or interactive modules Generative AI can adapt its content generation strategies to meet distinct preferences and learners needs This ensures an elevated engagement level and enhanced comprehension highlighting its potential to transform traditional teaching methodologies *Human-Computer Creativity*

Vladimir Geroimenko, 2025-06-16 This pioneering volume showcases how generative AI has evolved from a mere tool to a creative partner transforming the boundaries of innovation and collaboration across various disciplines With contributions from 53 global experts spanning 21 countries this comprehensive resource explores the transformative impact of AI on education art and healthcare It reveals how AI enhances learning experiences fosters new artistic expressions and revolutionises patient care and medical research Organised into five thematic parts the book offers a balanced mix of conceptual frameworks case studies and practical insights providing readers with a thorough understanding of how human ingenuity and artificial intelligence intersect to solve problems inspire creativity and redefine industries Whether you are an academic practitioner or inquisitive reader this volume invites you to engage with the cutting edge possibilities of generative AI and embrace the future of human computer collaboration

**Continuing Engineering Education for a Sustainable Future** Patricia Caratozzolo, Angeles Dominguez, Bente Nørgaard, Guillermo M. Chans, 2025-08-06 The World Economic Forum stated in its 2023 Future of Jobs report that 44% of workers skills will change in the next five years Additionally six out of ten workers will require training before 2027 and only half will have adequate training opportunities With this in mind the three most pressing challenges currently facing the Continuing Engineering Education CEE community include 1 The shifting skill requirements dictated by the job market Engineering roles in various sectors are evolving demanding a mix of Knowledge Skills and Abilities KSA that is difficult to predict with certainty In addition the pace of Digital Transformation will highly influence these requirements 2 The climate change mitigation and adaptation Engineers must reskill and adapt to changing sustainability requirements and educational programs must support this transition 3 The underrepresentation of minorities Women racial and ethnic minorities and individuals with disabilities face disparities in opportunities mentorship and inclusion

**KI 2008: Advances in Artificial Intelligence** Andreas Dengel, Karsten Berns, Thomas Breuel, Frank Bomarius, Thomas R. Roth-Berghofer, 2008-09-24 KI 2008 was the 31st Annual German Conference on Artificial Intelligence held September 23-26 at the University of Kaiserslautern and the German Research Center for Artificial Intelligence DFKI GmbH in Kaiserslautern Germany The conference series started in 1975 with the German Workshop on AI GWAI which took place in Bonn and represents the first forum of its type for the German AI Community Over the years AI has become a major field in computer science in Germany involving a number of successful projects that received much international attention Today KI

conferences are international forums where participants from academia and industry from all over the world meet to exchange their recent research results and to discuss trends in the field. Since 1993 the meeting has been called the Annual German Conference on Artificial Intelligence designated by the German acronym KI. This volume contains the papers selected out of 77 submissions including a number of submissions from outside German speaking countries. In total 15 submissions 19% were accepted for oral and 30 39% for poster presentation. Oral presentations at the conference were in a single track. Because of this the choice of presentation form oral poster was based on how well reviews indicated that the paper would fit into one or the other format. The proceedings allocate the same space to both types of papers. In addition we selected six papers that show high application potential describing systems or prototypical implementations of innovative AI technologies. They are also included in this volume as two page extended abstracts.

**AI in Early Education** Stamatis Papadakis, 2025-10-20. An original and up to date examination of how to use AI to improve pre school and early childhood education. In *AI in Early Education: Integrating Artificial Intelligence for Inclusive and Effective Learning* examines how to use artificial intelligence technology to enhance teaching and learning with personalized learning pathways inclusive instructional practices and increased student engagement. The book explores key themes like AI literacy for young learners ethical and pedagogical considerations and the professional development that educators need to effectively integrate these tools into their classrooms. You will also find Ways to use AI to support diverse learners including those with special educational needs. Hands on strategies that offer educators clear practical ways to bring AI tools into the classroom.
