Social comparisons on Instagram and users' self-esteem. How social media affects our self-perception Nick Feldmann, 2022-03-16 Bachelor

Thesis from the year 2019 in the subject Psychology Media Psychology language English abstract Social networks allow us to

keep in touch with people all over the world In addition to personal messages many users also post pictures and videos from their everyday lives For many people however this has not only positive effects In fact social media can also have a negative impact on our sense of well being In particular the constant comparison with the postings of other users can unsettle not only young people Nick Feldmann looks at the connection between social comparison processes on Instagram and the user s self esteem Due to the high user numbers of social media a particularly large number of people are affected by these mechanisms Self perception also has a major influence on success in life Feldmann therefore examines the extent to which conscious and unconscious comparison with other people in social networks affects self worth *Instagram Marketing* David J.
