Mental Health Self-Help Louis D. Brown, Scott Wituk, 2010-08-05

Building on earlier patient empowerment movements, consumer and advocate driven mental health self help (MHSH) initiatives currently outnumber traditional mental health organizations. At the same time, this apparent success raises significant questions about their short term efficacy and their value to lasting recovery. Mental Health Self Help assembles the state of the evidence on the effectiveness of MHSH, beginning with the individual and larger social factors behind the expansion of consumer directed services. Clearly organized and accessibly written, the book traces the development and evolution of MHSH as both alternative and adjunct to traditional mental health structures, offers research based perspectives on the various forms of MHSH and identifies potential areas for consumer initiatives to work with and help improve mental health systems. Contributors weigh strengths and limitations, raise research and methodology questions and discuss funding and training issues to give readers a deeper understanding of the field and an informed look at its future impact on mental health treatment. Individual chapters cover the spectrum of contemporary self help initiatives in mental health, including Online mutual aid groups, Consumer run drop in centers, Family and caregiver groups, Certified peer support specialists, Consumer advocacy initiatives, Technical assistance organizations, Professional self help collaborations. Mental Health Self Help is a bedrock guide to an increasingly influential aspect of the mental health landscape.
