Samsung Galaxy Near Me Returns:

Return to Spirit Christopher B. Soltis, 2019-07-16 Life doesn't come with an instruction manual. We are all born with different circumstances and opportunities and learn from our mistakes and experiences. The knowledge and wisdom gained are invaluable and make us stronger in mind, body, and Spirit. Chris details navigating obstacles of alcohol and drug abuse, severe depression, heart break, and loss from a long-term relationship, being near bankruptcy, and just about wanting to throw in the towel altogether. The only way out is through. This book gives his personal account of spontaneous Kundalini Awakening, which is the physiological mechanism of union of mind, body, and Spirit. Through a disciplined approach to wellness, yoga, and self-inquiry on such topics relating to Spirit, yoga, culture, society, history, philosophy, psychology, relationships, religion, freedom, genetics, evolution, mathematics, numerology, science, energy, astrology, love, paradise, eternity, consciousness, and the universe, Chris established the connection with the subtle body through his energy centers, chakras. His story is there to assist any reader in making the same connection and progressing on the path of spiritual growth and development.

Dangerous Technologies Brandaan Huigen, 2025-11-10 *Dangerous Technologies* focuses on the prevalent theft of consumer electronics in post-Apartheid South Africa. Through a material culture perspective, it explores why these objects have commonly been targeted by bandits and subsequently circulated through the criminal underground. The author traces ethnographically how devices travel between various social spheres, delving into the experiences of a range of individuals: from diverse residents who fall victim to criminals, to the bandits who steal electronics for money or drugs, the African migrants who export consignments of stolen electronics to their home countries, the envious residents who buy stolen electronics, and finally the police attempting to grapple with the problem. *Dangerous Technologies* suggests that electronics have widened digital divides between citizens, resulting in underground circuits that seek to violently redistribute enviable electronics to low-income residents who have not been able to formally participate in electronics consumption and use. Due to porous borders, the widespread theft and redistribution of electronics do not only stem from internal inequalities within South African society but also from broader disparities across the African continent. The book furthers knowledge about how and why, particularly modern electronics, have precipitated violent property crime in democratic South Africa. It is relevant to scholars of social and cultural anthropology, particularly those with an interest in material culture, digital anthropology, and economic and political anthropology, as well as criminologists.
