Mobile Mapping Clancy Wilmott, 2025-10-01 This book argues for a theory of mobile mapping a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power Drawing from literature in media studies and geography and the work of Michel Foucault and Doreen Massey it examines how geographical and historical material social and cultural conditions are embedded in the way in which contemporary digital cartographies are read deployed and engaged This is explored through seventeen walking interviews in Hong Kong and Sydney as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media In doing so Mobile Mapping offers an interdisciplinary rethinking about how multiple translations of spatial knowledges between rational digital epistemologies and tacit ways of understanding space and experience might be conceptualized and researched

Breaking Away Maurice E. Stucke, 2022 *Breaking Away* sounds a warning call alerting readers that their privacy and autonomy concerns are indeed warranted and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date Through the various prisms of economic theory market data policy and law the book offers a clear and accessible insight into how a few powerful firms Google Apple Facebook Meta and Amazon have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense While much has been written about these four companies power far less has been said about addressing their risks In looking at the proposals to date however policymakers and scholars have not fully addressed three fundamental issues First will more competition necessarily promote our privacy and well being Second who owns the personal data and is that even the right question Third what are the policy implications if personal data is non rivalrous *Breaking Away* not only articulates the limitations of the current enforcement and regulatory approach but offers
