Making Media Futures Phillip H. Roth, Ana María Guzmán Olmos, Alin Olteanu, Stefan Bösch, 2025-04-22 Making Media Futures offers a multi-perspectival exploration of how imaginaries and knowledge of the future are constructed in and through various media. The volume addresses the discursive dimensions of imaginaries and future visions as well as the impact of technological material and cultural conditions on the propagation of future discourses through media. Providing both theoretically detailed and empirically rich investigations, the contributions offer a wide range of cases spanning the century from the end of World War II until today and looking at examples from the Southern Hemisphere as well as the Global North. Bringing together scholars in media studies, science and technology studies, STS, and the history and philosophy of technology, the chapters discuss future visions and imaginations of quantum computing, the uncertainty and impact of AI-based text-to-image generation, the ideology behind 5G telecommunication standards, imaginaries of the Internet of Things, transmedia strategies in global and local climate protests, how broadcast radio was implicated in the evangelical mission imaginary, and how early visions of automating scholarly information management shaped standards and ideals of academia. The volume thus complements existing approaches and analytical frameworks for the study of imaginaries and futures discourses with perspectives that are sensitive to the plurality of media-specific conditions and technologies. The book will interest students and scholars working in media studies, STS, history, and philosophy, as well as at the intersection of engineering, humanities, and social sciences on matters such as sustainability, ethics, and responsible innovation. [Social Media Strategy](#) Keith A. Rethinking Identities Across Boundaries Claudia Capancioni, Mariaconcetta Costantini, Mara Mattosco, 2023-11-22 This collection of essays aims to widen the current critique on borders by examining their entanglements with constructions of identity and disciplinary categories In particular it calls into question established models of gender notions of narrative genres and typological genera of borders in today's literary artistic philosophical and socio political discourse The chapters interrogate

boundaries and boundary crossing not only in terms of geographical frontiers and the physical acts of trespassing but also as discursive constructs that police crossing subjects as gendered subjects on the one hand and identify artistic genres and academic disciplines as fixed sealed in ways of understanding the world on the other Taking inspiration from the multiple meanings of the Italian word *genere* which stands for gender genre and typology genus simultaneously the volume reflects on the gendered narrative and typological nature of borders and border imagery and on the significance and potentialities of crossover phenomena taking place in borderlands in the fields of arts literature anthropology sociology and philosophy

Medium Hot Hito Steyerl, 2025-06-10 WHAT IS THE FUTURE OF THE IMAGE IN THE AGE OF CLIMATE CHANGE AND ARTIFICIAL INTELLIGENCE Hito Steyerl is one of the most celebrated artists of our time Her work both as an artist and a writer has consistently challenged the political boundaries between art and technology In this new collection of groundbreaking essays she explores how AI the use of large language models and the algorithmic creation of imagery transform our understanding of the world She argues that such practices cannot be divorced from the economic and political conditions of the times *Medium Hot* is a collection of scintillating meditations on the limits of art and technology the essential handbook for the present conjuncture The pieces here probe the manufacture and distribution of images in the age of AI and climate change She asks whether art can be made not only by machines but for machines She argues against the production of images that heat up the planet disfranchise workers and fuel the arms trade and questions whether such creations can even be called art In an era of such rapid change Steyerl does vital work investigating whether machine learning will infiltrate every aspect of our lives and what that means for the future **Deepfakes** Graham

Meikle, 2022-09-22 What happens when we can no longer believe what we see Show the AI technologies that create deepfakes enough images of a celebrity or a politician and they will generate a convincing video in which that person appears to say and do things they have never actually said or done The result is a media environment in which anyone's face and image can be remixed and manipulated Graham Meikle explains how deepfakes synthetic media are made and used From celebrity porn and political satire to movie mash ups and disinformation campaigns this book explores themes of trust and consent as face swapping software becomes more common Meikle argues that deepfake videos allow for a new perspective on the taken for granted nature of contemporary media in which our capacity to remix and share content increasingly conflicts with our capacity to trust The book analyses how such videos deepen the social media environment in which the public and the personal converge and in which all human experience becomes data to be shared Timely clear and accessibly written this is an essential text for students and scholars of media communication cultural studies and sociology as well as general readers **Creating Images Using AI** Julie Pallant, 2025-01-02 Creating Images Using AI A Step by Step Guide to
