Sampling in Judgment and Decision Making Klaus Fiedler, Peter Juslin, Jerker Denrell, 2023-06-15 Sampling approaches to judgment and decision making are distinct from traditional accounts in psychology and neuroscience While these traditional accounts focus on limitations of the human mind as a major source of bounded rationality the sampling approach originates in a broader cognitive ecological perspective It starts from the fundamental assumption that in order to understand intra psychic cognitive processes one first has to understand the distributions of and the biases built into the environmental information that provides input to all cognitive processes Both the biases and restriction but also the assets and capacities of the human mind often reflect to a considerable degree the irrational and rational features of the information environment and its manifestations in the literature the Internet and collective memory Sampling approaches to judgment and decision making constitute a prime example of theory driven research that promises to help behavioral scientists cope with the challenges of replicability and practical usefulness

Filterworld Kyle Chayka, 2024-01-16 A MOST ANTICIPATED BOOK From New Yorker staff writer and author of *The Longing for Less* Kyle Chayka comes a timely history and investigation of a world ruled by algorithms which determine the shape of culture itself Filterworld is about how algorithms changed culture Chayka asks what is taste What is a sense of aesthetics And what happens to it when it collides with the homogenizing digital reality in which we now live Ezra Klein From trendy restaurants to city grids to TikTok and Netflix feeds the world round algorithmic recommendations dictate our experiences and choices The algorithm is present in the familiar neon signs and exposed brick of Internet cafes be it in Nairobi or Portland and the skeletal modern furniture of Airbnbs in cities big and small Over the last decade this network of mathematically determined decisions has taken over almost unnoticed informing the songs we listen to the friends with whom we stay in touch as we've grown increasingly accustomed to our insipid new normal This ever tightening web woven by algorithms is called Filterworld Kyle Chayka shows us how online and offline spaces alike have been engineered for seamless consumption becoming a source of pervasive anxiety in the process Users of technology have been forced to contend with data driven equations that try to anticipate their desires and often get them wrong What results is a state of docility that allows tech companies to curtail human experiences human lives for profit But to have our tastes behaviors and emotions governed by computers while convenient does nothing short of call the very notion of free will into question In Filterworld Chayka traces this creeping machine guided curation as it infiltrates the furthest reaches of our digital physical and psychological spaces With algorithms increasingly influencing not just what culture we consume but what culture is produced urgent questions arise What happens when shareability supersedes messiness innovation and creativity the qualities that make us human What does it mean to make a choice when the options have been so carefully arranged for us Is personal freedom possible on the Internet To the last question Filterworld argues yes but to escape Filterworld and even transcend it we must first understand it
