Student Loans in China Baoyan Cheng, 2011-03-24

In 1989 China started charging tuition on a very small scale at a number of universities as a result of the global trend of cost recovery policies thus ending the free higher education era in China It was not until 1997 that all higher education institutions in China started charging tuition and fees Both the expansion of higher education and the wide gap between income and tuition and fees have created an increasingly high proportion of students who are academically qualified but cannot afford to go to college To address the problem of the increasing number of financially needy students in 1999 China launched the pilot Government subsidized Student Loan Program GSSLP in eight cities This program was extended to full time students at all of the 1 942 public higher education institutions in 2000 and has been undergoing revisions ever since including major ones in 2004 and 2007 As of 2009 the number of financially needy students in China reached 5 27 million accounting for 23 06 percent of the total enrollment of 22 85 million at higher education institutions in China Behind those statistics are young people who suffer in many ways This book provides multiple perspectives namely global comparative empirical practical and philosophical ones on the GSSLP the largest financial aid program in current China It not only provides information on financial aid policies especially the GSSLP in China but also offers a comparative perspective by examining student loan programs in the United States and Australia which are more mature and better developed Using original dataset the empirical and practical perspectives examine the effect of the GSSLP on students behavior and look into the different aspects of the GSSLP including students perceptions of and attitudes toward the program as well as its implementation In addition to these technical aspects of the GSSLP this book also examines the larger concepts of equality and social justice from a philosophical perspective and argues

Handbook of Education Policy Research Lora Cohen-Vogel, Peter Youngs, Janelle Scott, 2025-08-15

The second edition of the Handbook of Education Policy Research the largest volume published in AERA's history addresses a variety of policy and contextual issues in early childhood K 12 and postsecondary education that have received extensive empirical attention during the past 15 years With the pandemic and social turmoil as a backdrop the editors build on the breadth and depth of the first edition while expanding

the scope of the project to include subjects methods theories and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s The field has become more comprehensive and inclusive and the authors represent a diversity of racial ethnic and gender identities and intellectual and disciplinary orientations Most chapters come from multiple authors reflecting the multi sourced development of research in education policy since the first volume was published This compilation consists of 70 chapters and nine commentaries that map past present and future directions of the field and richly attend to critical issues of interest to students researchers policy makers and practitioners

Aid and Inequality in Kenya Gerald Holtham, Arthur Hazelwood, 2010-11-29 This reissue first published in 1976 considers the rapid rate of economic growth in Kenya combined with its apparent political stability to determine whether or not this is indeed a case of growth without development and if so where the responsibility for aid lies in this situation The book concludes that while Kenyan growth has not been to an ideal pattern accompanied by an increase in inequality there is little or no reason to believe that living standards have not improved It examines the impact of aid on Kenya's progress at both the microeconomic and macroeconomic level and provides an institutional study of the impact of aid on Kenyan Government policy formation and administration and a discussion of British aid's political purposes and influence in Kenya The authors conclude that some of the effects predicted by the critics of aid are visible but that the net effect on general living standards has been strongly positive concluding that the problems constitute a case for improving aid procedures but not against aid itself

In Defense of American Higher Education Philip G. Altbach, Patricia J. Gumport, D. Bruce Johnstone, 2003-04-30 The current era in higher education is characterized by increased need for accountability and fiscal constraint coupled with demands for increased productivity Higher education is expected to meet the demand of changing student demographics as well as requests for research and service from government and industry To preserve the academy's ability to meet these demands the editors and contributors to this volume argue that while change is inevitable and desirable any radical alterations to the practices that have established and

upheld the excellence of higher education in the United States must be carefully considered The editors and contributors cherish the best ideals of higher education academic freedom commitment to both inquiry and teaching and preservation of an independence of mind and spirit in the face of external pressures At the same time the authors of these essays also reflect upon the failings of higher education including problematic historical legacies such as racism sexism and anti semitism In Defense of American Higher Education is a careful analysis of what we have inherited undertaken with a critical eye for constructive reform It will be of interest to anyone concerned about the future of American higher education
