iTake-Over David Arditi, 2020-06-23 The second edition of iTake Over The Recording Industry in the Streaming Era sheds light on the way large corporations appropriate new technology to maintain their market dominance in a capitalist system To date scholars have erroneously argued that digital music has diminished the power of major record labels In iTake Over sociologist David Arditi suggests otherwise adopting a broader perspective on the entire issue by examining how the recording industry strengthened copyright laws for their private ends at the expense of the broader public good Arditi also challenges the dominant discourse on digital music distribution which assumes that the recording industry has a legitimate claim to profitability at the expense of a shared culture Arditi specifically surveys the actual material effects that digital distribution has had on the industry Most notable among these is how major record labels find themselves in a stronger financial position today in the music industry than they were before the launch of Napster largely because of reduced production and distribution costs and the steady gain in digital music sales Moreover instead of merely trying to counteract the phenomenon of digital distribution the RIAA and the major record labels embraced and then altered the distribution system

Anderson,2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments *Electronic Commerce 2018* Efraim Turban,Jon Outland,David King,Jae Kyu Lee,Ting-Peng Liang,Deborah C. social commerce social collaboration shared economy innovations and mobility *Rethinking Informed Consent in the Big Data Age* Adam J. Andreotta, 2024-12-23 In the big data age providing informed consent online has never been more challenging. Countless companies collect and share our personal data through devices, apps, and websites, fuelling a growing data economy and the emergence of surveillance capitalism. Few of us have the time to read the associated privacy policies and terms and conditions, and thus are often unaware of how our personal data are being used. This is a problem as in the last few years large tech companies have abused our personal data. As privacy self-management through the mechanism of providing online consent has become increasingly difficult, some have argued that surveillance capitalism and the data economy more broadly need to be overthrown. This book presents a different perspective. It departs from the concept of revolutionary change to focus on pragmatic incremental solutions tailored to everyday contexts. It scrutinises how consent is currently sought and provided online and offers suggestions about how online consent practices can be improved upon. These include the possibility of subjecting consent gathering practices to ethics committees for review, the creation of visual based consent agreements, and privacy policies to help with transparency and engagement, the development of software to protect privacy, and the idea of automated consent functionalities that allow users to bypass the task of reading vast amounts of online consent agreements. The author suggests that these small scale changes to online consent obtaining procedures could, if successfully implemented, provide us with a way of self-managing our privacy in a way that avoids a revolutionary dismantling of the data economy. In the process, readers are encouraged to rethink the very purpose of providing informed consent online. *Rethinking Informed Consent in the Big Data Age* will appeal to researchers in normative ethics, applied ethics, philosophy of law, and the philosophy of AI. It will also be of interest to business scholars, communication researchers, students, and those in industry.

Globalization and Media in the Digital Platform Age Dal Yong Jin, 2025-08-04 An empirically rich and student friendly book in which global media expert Dal Yong Jin discusses the nexus of globalization, digital media, and popular culture, and provides an essential introduction to the shifting media ecology of the early 21st century. Offering an in-depth look at globalization processes as they relate to the global media, this second edition maps out the increasing role of digital platforms as they continue to shift the contours of globalization. This book introduces core theoretical concepts such as cultural imperialism, platform imperialism, and soft power that can be critically applied to a broad range of contemporary media policies, practices, movements, and technologies in different geographic regions of the world, with a view to determining how they shape and are shaped by globalization. Fully updated throughout, this second edition explores new critical issues such as the impact of COVID-19 and the growth of artificial intelligence (AI) in cultural production, emphasizing the ever-increasing role digital platforms play in the globalization process. It also introduces new theoretical frameworks for understanding globalization, such as transnational proximity. End of chapter discussion questions prompt further critical thinking and research. An essential book for students of digital media, global media, and globalization that want to understand
