International Labour Standards and Platform Work Mathias Wouters, 2021-11-25 Platform work the matching of the supply of and demand for paid labour through an online platform often depends on workers who operate in a grey area between the archetype of an employee and a self employed worker This important book explores the utility of the International Labour Organization s existing standards in governing this phenomenon It indicates that despite their relevance many standards have little or no impact The standards apply to the issue but they fail to connect with it The author shows how three ILO conventions the Home Work Convention 1996 No 177 the Private Employment Agencies Convention 1997 No 181 and the Domestic Workers Convention 2011 No 189 can be revitalised to have an impact on the platform work debate In the course of the analysis he responds in depth to such questions as the following What are digital labour platforms What does decent work mean Did the ILO centenary fundamentally change anything What is the link between private employment services and platform work How do crowdworkers relate to homeworkers and teleworkers Are platform workers engaged in domestic work What form could a future ILO standard on platform work take Given that the ILO plans to start discussions on a potential future standard for platform work in 2022 this book will prove very useful in highlighting the issues and standards that such discussions should consider Research has shown that the techniques and tools of the platform economy have spread far beyond gig work resulting in widespread gigification and restructuring of workplace behaviours and relationships jobs and communities across the world For this and other reasons including the book s detailed analysis of issues not addressed elsewhere labour lawyers in house counsel researchers and policymakers will gain valuable insight into what decent work in the platform economy would require thus greatly broadening the discussion on this difficult to regulate phenomenon

Stories of Globalization Alessandro Bonanno, Douglas H. Constance, 2010-11-01 The economic and social outcomes of mid twentieth century Fordist capitalism were characterized by a decrease in the significance of distance and a shift in the dynamic of time This time space compression is one of the defining components of contemporary globalization In their latest collaboration Alessandro Bonanno and Douglas Constance provide an in depth analysis of the origins and nature of globalization using the context of the agro food sector one of the most globalized socioeconomic sectors in the world Breaking from widely used methodologies in the study of globalization Bonanno and Constance argue that the shifting dynamic of space and time has created a new

capitalism that is qualitatively different from capitalism inspired by patterns of international relations established throughout the nineteenth and early twentieth centuries The book provides an extensive and original review of existing literature and is centered on eight specific case studies Through the analysis of these stories of globalization the authors examine how the origins of and interactions between transnational corporations groups that resist these organizations and the state have given birth to a contemporary understanding of globalization They use this new understanding to analyze globalization as a contested terrain in which the power of transnational corporations is affected by mounting opposition and internal contradictions BOOK JACKET **Federal Probation** ,2001
