Security Webs and 21st Century Threats Isaac M. Castellano,2025-08-29 This book introduces a new framework of Security Webs which unifies the traditional state security approach with the human security approach and applies this framework to emerging security concerns in the 21st century Security Webs offers a framework to examine security threats responses and second and third order consequences across a range of actors and the structure to draw in existing findings theories and other frameworks into a universal and holistic approach to security At its core it clarifies the interconnected nature of security across time and space Borrowing the concept of food webs from the field of ecology which maps out how animals and plants gain energy and food the Security Webs framework allows for an examination of the security of an actor be it a nation state non state actor or

an individual where each actor gains strength and security but likewise is also threatened The book profiles several of the emerging security threats and illustrates how the Security Webs framework can help us study these these threats include climate change weak state capacity and political extremism which all pose significant threats to states non state actors and individuals alike Bridging the divide between the traditionalist and the human security camps the book embraces the complexity that not only is international security and offers a framework applicable to every actor but also when applied creates a clear picture of security threats and arrangements This book will be of interest to students of security studies human security environmental security and International Relations
