book provides an important platform for developing expertise in a fascinating and growing field. It is required reading from my students. Archives of Clinical Neuropsychology. The book will provide an excellent reference for health care providers in the area of concussion management and the increased emphasis on the incorporation of neurocognitive testing and the role of neuropsychologists. This is information that needs to out in the Sports Medicine arena as to how to incorporate neuropsychologists in the Sports Medicine team. Steven L Cole, ATC, Associate Athletic Director, Internal Operations, College of William and Mary. Dr. Webbe has used his vast knowledge and experience in the field of sports neuropsychology to create a superb road map which provides important information and direction for the study of sports concussion. This handbook reflects his skill in attracting some of the world's leaders in sports neuropsychology as chapter authors and his ability to organize and integrate their unique funds of knowledge. From the Foreword by Jeffrey T. Barth, PhD, University of Virginia School of Medicine. An estimated 300,000 sport-related concussions occur every year in the United States, many of which lead to short or long-term impairment or even sudden death. Frank Webbe, one of the foremost leaders in the field, has compiled the most up-to-date comprehensive volume on sport neuropsychology currently available. It presents through the contributions of leading practitioners in the field an exhaustive study of sport-related concussions and the multitude of management and treatment issues that arise from them. The handbook is structured within a conceptual framework which includes an overview of the field, ethical considerations, risk factors, and mechanisms, diagnosis and assessment, and counseling and rehabilitation principles. It integrates research findings from a wide variety of professional and amateur sports including football, hockey, boxing, wrestling, and others. The book also addresses collateral effects of mild and traumatic head injury such as Alzheimer's disease, Parkinson's disease, and depression. Synthesizing all the diverse facets of the burgeoning field of sport neuropsychology, this clear and concise volume will serve as a springboard for research yet to be realized. Key features: Integrates knowledge from sports and exercise science with neuropsychology. Includes the latest research on the role of neuroimaging and electrophysical approaches to understanding concussion. Clarifies the professional training and ethical behavior of a sport neuropsychologist. Highlights the emotional components of concussion. Discusses the acute and chronic effects of repeated head trauma. *Traumatic Brain Injury in Sports*, Mark Lovell, Jeffrey Barth, Michael Collins, Ruben Echemendia, 2020-07-09. Traumatic brain injury (TBI) in sports has become an important international public health issue over the past two decades. However, until recently, return to play decisions following a sports-related traumatic brain injury have been based on anecdotal evidence and have not been based on scientifically validated clinical protocols. Over the past decade, the field of Neuropsychology has become an increasingly important component of the return to play decision-making process following TBI. Neuropsychological assessment instruments are increasingly being adapted for use with athletes throughout the world, and the field of sports neuropsychology appears to be a rapidly evolving subspecialty. This book provides a comprehensive overview of the application of neuropsychological assessment instruments in sports, and it is

structured to present a global perspective on contemporary research In addition to a review of current research Traumatic Brain Injury in Sports An International Neuropsychological Perspective presents a thorough review of current clinical models that are being implemented internationally within American and Australian rules football soccer boxing ice hockey rugby and equestrian sports
