HISTORY OF STREAMING

Streaming is a way to watch movies, listen to music, and use other digital content without downloading it. It's like having a library of everything you want, but you don't have to own anything. This is how streaming works: you pay a monthly fee, and you can watch or listen to anything you want, anytime you want. The only thing you need is an internet connection and a device that can play the content, like a computer, tablet, or smartphone.

Streaming is the opposite of downloading. When you download something, you have to wait for it to finish downloading before you can use it. With streaming, you can start using it right away. This is why streaming is so popular. It's convenient and easy to use.

The idea of streaming didn't come out of nowhere. It was actually a result of a few different things. First, there were people who wanted to watch movies online, but they didn't want to pay for a DVD or Blu-ray. Then, there were people who wanted to listen to music online, but they didn't want to buy a CD. Finally, there were people who wanted to use other digital content online, but they didn't want to download it.

As the internet grew, more and more people started using it. This led to a big increase in the amount of digital content that was available online. This is what made streaming possible. Without all this digital content, there would be nothing to stream.

Streaming is still growing. More and more people are using it, and more and more content is being made for it. This is why it's so important to understand the history of streaming. It helps us see how it got here and where it's going.
