Burned by Billionaires Chuck Collins, 2025-10-07 A scathing exposé of the hidden impact of America's ultra wealthy on our social economic political and ecological landscape as well as a path toward a more equitable future The three hundred largest yachts in the world emit as much carbon dioxide as the ten million inhabitants of Burundi from **Burned by Billionaires** Recently it has become increasingly evident that extreme concentrations of wealth and power have profound impacts on our politics but extreme inequality's influence on our daily lives and our futures has been vastly overlooked In **Burned by Billionaires** author and a senior scholar at the Institute for Policy Studies in Washington DC Chuck Collins chronicles how the actions of the top 0.1% have severe consequences for the rest of us especially those of marginalized identities Collins takes down the myth of meritocracy unraveling how the rich rig the game in their favor resulting in a concentration of wealth in the hands of a tiny but growing class of billionaires leading to both intense income and political polarization In a wholly original argument Collins charts this economic social and ecological destruction and shows how these effects manifest in every facet of our society including Increasing the tax burden on ordinary working people Reducing public funding for schools roads and other essential infrastructure Shrinking the pool of affordable housing especially in poor and urban areas Accelerating climate change and dictating what ends up on our dinner plate Shaping the news we consume and fueling the spread of misinformation Collins argues that perhaps worst of all the concentration of wealth and power is leading to political hijacking undermining the democratic principle that our votes matter equally Full of engrossing charts graphs political cartoons and more this book is an urgent call to action and road map to a more equitable society where everyone has access to the resources that will allow them to thrive and one where it is no longer commonplace to live in a constant state of uncertainty fear and anxiety **Burned by Billionaires** offers a pointed prescription for taking power back from the billionaire class and achieving the shared prosperity that comes from a healthy and equal society

Abductive Minds: Essays in Honor of Lorenzo Magnani - Volume 1 Selene Arfini, 2025-09-26 This book the first of two volumes provides novel perspectives on the study of abduction by analyzing both Magnani's ample investigation of the subject and discussing its rising importance in today's epistemology and philosophy of science Notwithstanding the long history of the concept which has been studied since its analysis in Aristotle's *Organon* in the last fifty years it has known a resurgent interest in the epistemological literature since it is an ampliative inference deemed to be at the core of creative leaps and acts of discovery For these reasons different open questions still bother interested researchers which constraints affect abductive reasoning when a hypothesis is evaluated or selected Should we adopt a unified view on abduction or maintain a pluralistic perspective regarding its forms and functions What kinds of models can be used in abductive reasoning This last question in particular shows how the topics of the two parts of the volume are intrinsically connected and ensures they are of great importance to those interested in epistemology philosophy of science mathematical logic and AI
