Evaluation using the Translational Science Benefits Model Framework in the National Center for Advancing Translational Science Clinical and Translational Science Award Program Pamela Davidson,Joe Hunt,Douglas Luke,Anna La Manna,2025-11-10 Knowledge translation is a critical activity that helps transform research results into new practices and policies that benefit health and society Similar to other countries the US has initiated a translational science research program in clinical research and public health In the US the National Institutes of Health NIH and the National Center for Advancing Translational Science NCATS have addressed this challenge through the Clinical and Translational Science Award CTSA Program The charge of the CTSA Program is to transform the organization and infrastructure of the academic research enterprise to facilitate the movement of discoveries from clinical science to the bedside and community Documenting the results of these efforts is a necessary component to assess outcomes health and social impacts and support continuous improvement In the CTSA program the 60 CTSA hubs primarily located at academic health sciences research institutes across the nation are just starting to systematically measure and evaluate the impacts of their activities One example of tracking and assessing impact is the Translational Science Benefits Model TSBM introduced in 2018 which is one of the first frameworks for standardized documentation and dissemination of data on outcomes and impacts of translational science and translational research Additionally this Research Topic will explore and compare models and measurement tools used to assess the impact of translational science research internationally This Research Topic will highlight the use of the Translational Science Benefits Model TSBM and other impact evaluation models applied by investigators across a wide spectrum of medical and public health areas including CTSA hubs community international partners and others Although translational science is still in its infancy much work is being conducted nationally and internationally to integrate impact evaluation on medical and public health practice the economy and health policy In terms of a prevention orientation the TSBM can be used to track program development implementation and impacts on preventing and addressing disease The TSBM framework is also useful for changing the culture of academic research settings to place more value on health and

social impacts as well as providing training opportunities for early career investigators on how to design for impact at the beginning of programmatic research The TSBM framework has been successfully deployed within the context of the CTSA Program Sharing successful applications of the TSBM across a wider range of research dissemination and implementation is needed to fully understand its strengths and limitations to refine and improve it further and to study its application in a variety of contexts Hence this model has the potential to become a standard for systematic comparable reporting of translational science impact on health and societal benefits We aim to identify similar impact models deployed within international research settings The scope of this Research Topic includes advances in data collection methodology analysis and results from the application of the TSBM in the CTSA Program as well as with community and international partners Specific themes might include but are not limited to Development and use of quantitative metrics and qualitative measures using the TSBM TSBM as an educational intervention to train junior investigators on impact in translational science Longitudinal evaluation to show potential and demonstrated impact in specific research areas e g software development public health policy change Integrating social determinants of health disparities and equity in impact evaluation Application of TSBM results to improve operations and translational science in core areas of CTSA hubs TSBM is used to deliver new programs applications and community engagement to build cases in the 4 domains Examples of TSBM used to track research findings into public health practice Examples of international application of the TSBM and other impact models

Free Speech and Censorship Cari Lee Skogberg Eastman,2022-02-15 This annotated document collection surveys the history and evolution of laws and attitudes regarding free speech and censorship in the United States with a special emphasis on contemporary events and controversies related to the First Amendment The United States collective understanding of First Amendment freedoms was formed by more than 200 years of tensions between the power of word and the power of the government During that time major laws and legal decisions defined the circumstances and degree to which personal expression could be rightfully expressed and rightfully limited This struggle to define the parameters of free speech continues today Vibrant and passionate debates about First Amendment limitations once inspired by the dissemination of birth control information now address such issues as kneeling during the national anthem removing controversial books from

public libraries attempts by the Trump administration to discredit the press and disseminating false or hateful information through social media platforms By exploring diverse examples of censorship victories and triumphs of free expression readers will better understand the enormous impact of First Amendment freedoms on American society **The Complete Book of Colleges, 2020 Edition** Princeton Review,2019-07-02 No one knows colleges better than The Princeton Review Inside The Complete Book of Colleges 2020 Edition students will find meticulously researched information that will help them narrow their college search *Governance in Sport* Bonnie Tiell,2025-03-28 Governance in Sport Analysis and Application Second Edition examines governance within sport organizations at all levels of sport and across industry sectors Drawing from both analytical and applied perspectives students will learn principles of good governance and ethical decision making *Principles and Practice of Sport Management with Navigate Advantage Access* Lisa Pike Masteralexis,2023-06-15 Principles and Practice of Sport Management provides students with the foundation they need to prepare for a variety of sport management careers Intended for use in introductory sport management courses at the undergraduate level the focus of this text is to provide an overview of the sport industry and cover basic fundamental knowledge and skill sets of the sport manager as well as to provide information on sport industry segments for potential employment and career opportunities
