The Power of Middle School Keen J. Babbage, 2012-09-14 The middle school years are a maze of academic duties human growth and self development discovering self identity and increasing social interaction with other people This maze can be an adventure of achievement and opportunity or it can be a struggle of difficulty and disappointment As these experiences are the impetus or foundation for many later achievements in academics careers and personal life it is imperative that educators maximize these formative years by helping middle school students successfully travel through this maze despite its ups and downs its twists and turns and its new challenges to master and the old issues to resolve For instance educators must support students who have fallen behind so as to thwart their reduced likelihood of turnaround in high school Likewise educators must challenge exceptional students in order to perpetuate their enthusiasm for learning and prepare them for college studies By discussing the comprehensive roles and duties of school administrators counselors and teachers The Power of Middle School addresses how to maximize middle school curriculum and extra curricular activities for

not how much a child can remember but how much they can figure out if when they forget *Latinos/as and Mathematics Education* Kip Téllez, Judit N. Moschkovich, Marta Civil, 2011-05-01 This book that explores the mathematics education of Latinos as in 13 original research studies Each chapter represents research that grounds mathematics instruction for Latinos as in the resources to be found in culture and language By inverting the deficit perspective this volume redresses the shortcomings found in the previous literature on Latino a learners Each study frames language e g bilingualism not as an obstacle to learning but as a resource for mathematical reasoning Other chapters explore the notion of cultural variation not as a liability but as a tool for educators to build upon in the teaching of mathematics Specifically the book reframes culture as a focus on the practices objects inscriptions or people that connect mathematical concepts to student thinking and experiences both in and out of school The book s four sections divide the research The first section of the book focuses on mathematic learning in classrooms specifically exploring bilingual Latino a students the second section explores Latino a learners in communities including the role parents can play in advancing learning the third section includes chapters focused on teacher professional growth the final section concerns the assessment and mis assessment of Latino a learners The research shared in this volume provides ample evidence that mathematics educators who choose to ignore language or culture in their pedagogy risk shortchanging their Latino a students **The Link** ,2004
