*The All-American Girls Professional Baseball League Record Book* W.C. Madden, 2015-08-13. For a dozen years during the 1940s and 1950s, more than 600 women played professional baseball in the All-American Girls Professional Baseball League. Some of these women compiled some eye-popping statistics unequaled by their male counterparts: Sophie Kurys swiped 200 bases in one season; Joanne Winter hurled 63 consecutive scoreless innings; pitcher Jean Faut sported a .910 winning percentage one season. Few know that Joanne Weaver was the last professional baseball player to hit 400 in a season, 429 in 1954. This reference book contains the hitting, fielding, and pitching records of all women who played in the AAGPBL during its 12-year history. The book also contains all of the team and individual playoff records of the league compiled for the first time. Included herein are rosters of the all-star teams as well as a listing of all pitching and batting champions. A brief history of the league is recounted. Complementing the statistics are photos of the league championship teams and key players.

**Space as a Strategic Asset** Joan Johnson-Freese, 2007-03-27 Joan Johnson Freese argues that the race for space weapons and the U S quest for exclusive or at least dominant ownership of strategic space assets have alienated the very allies that the United States needs in order to maintain its leading role in space exploration Taking a balanced look at the issues that have contributed to the decline of America s manned space program such as lack of political support and funding Johnson Freese offers not only a critique but also a plan for enhancing U S space security through cooperation rather than competition She begins with a brief overview of the history of international space development through four eras before Sputnik the space race after Apollo and globalization Then she focuses on how policy changes of the mid 1990s have changed the nation examining why the United States has grown obsessed with the development of space technology not just as a tool for globalization but as a route toward expanding an already dominant arsenal of weapons Johnson Freese claims that these policy choices have greatly affected the attitudes and actions of other countries and in the fight to achieve security the United States has instead put itself at greater peril Johnson Freese explains complex technical issues in clear accessible terms and suggests a way forward that is comprehensive rather than partisan America is not the only country with space ambitions but it is unique in viewing space as a battlefield and the technological advancements of other nations as a dire threat Urgent and persuasive *Space as a Strategic Asset* underscores the danger of allowing our space program to languish and the crucial role of cooperation in protecting the security of our country and the world
