Directions: Read both sections below. Compare and contrast the two animals.

DOLPHINS

A dolphin is a warm-blooded mammal that lives in the ocean. Dolphins give birth to babies that are called calves. They also breathe oxygen. A dolphin must live near the surface where it can breathe air. Dolphins are known to be vocal and social animals. They swim in pods where they come together with their mates to travel. Dolphins have a dorsal fin on their back, two fins on their side, and a tail. They also have a blowhole on top of their body. Their tail is horizontal and is used to swim in an up-and-down motion. A dolphin will eat things like fish, crustaceans, squid and shrimp.

SHARKS

Sharks are cold-blooded fish that live in the ocean. They spend their whole lives deep underwater. Like other fish, sharks have gills to remove oxygen from the environment. Sharks prefer to live and hunt alone. They do not like to socialize with other sharks. Sharks have a dorsal fin on their back, two fins on their side, and a tail. They also have gills on the side of their body. Their tail is vertical and is used to swim in a side-to-side motion. A shark will eat things like fish, crustaceans, squid, shrimp, other sharks, marine mammals, and plankton.

Reading Passages that Build Comprehension Linda Beech, 2005 Grades 2-3 **Reading Comprehension and Skills, Grade 6**, 2014-03-15 Reading Comprehension and Skills for sixth grade is designed to help students develop a strong foundation of reading basics so that they will become competent readers who can advance to more challenging texts. It includes engaging passages and stories about a variety of subjects to appeal to all readers. The book also encourages vocabulary development and reinforces reading comprehension through leveled activity pages that target each student's individual needs for support. Kelley Wingate's Reading Comprehension and Skills is the perfect choice for both teachers and parents. This valuable reading and comprehension skills practice book provides nearly 100 reproducible pages of exciting activities, 96 durable flash cards, and a motivating award certificate. The differentiated activity pages give students the practice they need at a level that is perfect to help them master basic reading comprehension skills necessary to succeed and are great for use at both school and home. *Understanding and Teaching Reading Comprehension* Jane Oakhill, Kate Cain, Carsten Elbro, 2014-08-21 The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in recent years, but despite this there is very little written on this vital topic accessible to trainee and practicing teachers. The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children. It provides a detailed examination of the characteristics of children who have reading comprehension difficulties and examines ways in which comprehension can be supported and improved. It is accessibly written for students and professionals with no previous background in the psychology of reading or reading problems. This indispensable handbook asks the question: what is comprehension? The authors consider comprehension of different units of language: understanding single words, sentences, and connected prose, and outline what readers and listeners have to do to successfully understand an extended text. This book also considers comprehension for different purposes: in particular, reading for pleasure and reading to learn, and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability, vocabulary knowledge, syntactic skills, memory, and discourse level skills such as the ability to make inferences, knowledge about text structure, and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills or their precursors in pre-readers provides the foundation for reading comprehension development. Areas covered include Word reading and comprehension, Development of comprehension skills, Comprehension difficulties, Assessment, Teaching for improvement. Throughout the text, successful experimental and classroom-based interventions will be highlighted, practical tips for teachers, and summary boxes detailing key points and explaining technical terms will be included in each chapter. *The Road to Independent Reading*
