dialectics the last one is based on and only According to this theory every idea tends to be neutralized and balanced by and ideas as a state of equilibrium In a classical way are disjoint two by two But since in many cases the borders between notions are vague imprecise Sorites it is possible that and of course have common parts two by two or even all three of them as well Neutrosophic Set and Neutrosophic Logic are generalizations of the fuzzy set and respectively fuzzy logic especially of intuitionistic fuzzy set and respectively intuitionistic fuzzy logic

Data-Driven Decision Making in Entrepreneurship

Nikki Blacksmith, Maureen E. McCusker, 2024-04-02 Since the beginning of the 21st century there has been an explosion in startup organizations Together these organizations have been valued at over 3 trillion In 2019 alone nearly 300 billion of venture capital was invested globally Global Startup Ecosystem Report 2020 Simultaneously an explosion in high volume and high velocity of big data is rapidly changing how organizations function Gone are the days when organizations can make decisions solely on intuition logic or experience Some have gone as far as to say that data is the most valuable currency and resource available to businesses and startups are no exception However startups do differ from their larger counterparts and corporations in three distinct ways 1 they tend to have fewer resources time and specialized training to devote to data analytics 2 they are part of a unique entrepreneurial ecosystem with unique needs 3 scholarship and academic research on human capital data analytics in startups is lacking Existing entrepreneurship research is primarily conducted in business schools There needs to be more integration of industrial organizational psychology and entrepreneurship This book was designed to do just that to demonstrate how organizational psychology with a focus on human capital data and analytics can advance the science and practice of entrepreneurship This book is purposefully designed to address the unique idiosyncrasies of the science research and practice of startups and the entrepreneurial ecosystem Each chapter takes a science practice perspective highlighting a specific human capital management topic e g learning and development team effectiveness human capital due diligence and discusses how leveraging data can help enhance decision making The volume is grounded in sound theory and practice of organizational psychology entrepreneurship and management It is divided into three parts 1 human capital assessment and development for startups 2 understanding startup situations environments and support systems and 3 measuring startup level performance
