Mastering Reinforcement Learning with Python Enes Bilgin, 2020-12-18 Get hands on experience in creating state of the art reinforcement learning agents using TensorFlow and RLlib to solve complex real world business and industry problems with the help of expert tips and best practices Key Features Understand how large scale state of the art RL algorithms and approaches work Apply RL to solve complex problems in marketing robotics supply chain finance cybersecurity and more Explore tips and best practices from experts that will enable you to overcome real world RL challenges Book Description Reinforcement learning (RL) is a field of artificial intelligence (AI) used for creating self

learning autonomous agents Building on a strong theoretical foundation this book takes a practical approach and uses examples inspired by real world industry problems to teach you about state of the art RL Starting with bandit problems Markov decision processes and dynamic programming the book provides an in depth review of the classical RL techniques such as Monte Carlo methods and temporal difference learning After that you will learn about deep Q learning policy gradient algorithms actor critic methods model based methods and multi agent reinforcement learning Then you ll be introduced to some of the key approaches behind the most successful RL implementations such as domain randomization and curiosity driven learning As you advance you ll explore many novel algorithms with advanced implementations using modern Python libraries such as TensorFlow and Ray s RLlib package You ll also find out how to implement RL in areas such as robotics supply chain management marketing finance smart cities and cybersecurity while assessing the trade offs between different approaches and avoiding common pitfalls By the end of this book you ll have mastered how to train and deploy your own RL agents for solving RL problems What you will learn

- Model and solve complex sequential decision making problems using RL
- Develop a solid understanding of how state of the art RL methods work
- Use Python and TensorFlow to code RL algorithms from scratch
- Parallelize and scale up your RL implementations using Ray s RLlib package
- Get in depth knowledge of a wide variety of RL topics
- Understand the trade offs between different RL approaches
- Discover and address the challenges of implementing RL in the real world

Who this book is for This book is for expert machine learning practitioners and researchers looking to focus on hands on reinforcement learning with Python by implementing advanced deep reinforcement learning concepts in real world projects Reinforcement learning experts who want to advance their knowledge to tackle large scale and complex sequential decision making problems will also find this book useful Working knowledge of Python programming and deep learning along with prior experience in reinforcement learning is required
