Human vs ChatGPT - Language of Advertising in Beauty Products Advertisements Ida Skubis, Dominika Kołodziejczyk, 2024-11-21 This book systematically investigates the linguistic strategies employed in beauty product advertising to assess their persuasive and manipulative effects. The work is divided into two sections: a review of relevant literature and an empirical analysis of advertisements. The analysis initially focuses on the linguistic features of advertisements created by humans prior to the introduction of ChatGPT, examining the linguistic measures used and their methods of persuasion and manipulation. Subsequent sections provide a detailed examination of advertisements generated by ChatGPT versions 3.5 and 4.0, analysing the artificial intelligence's use of linguistic techniques. This includes a meta-analysis where ChatGPT itself discusses the linguistic strategies it employs. The ultimate goal is to compare and contrast the effectiveness and linguistic devices used in advertisements crafted by humans and those by ChatGPT, analysing how AI influences the language of advertising and its impact on consumer behaviour.

Media Management and Artificial Intelligence Alex Connock, 2022-11-18 This cutting-edge textbook examines contemporary media business models in the context of Artificial Intelligence (AI) and digital transformation. AI has dramatically impacted media production and distribution, from recommendation engines to synthetic humans, from video to text tools to natural language models. AI is really the change agent of the media industry. Answered: a natural language generation model when AI was asked about the subject of this book. It will open incredible opportunities. This book seeks to explore them. The media is examined through four sections: Principles maps business models and the key tools of AI; Platforms covers distribution channels in Games, Streamers, Social Networks, Broadcast, and Digital Publishing; Producers covers the engines of content making, including Scripted Entertainment, Factual Content Marketing, Creators, and Music; Finally, Pioneers covers emerging sectors of Podcasting, Esports, the Metaverse, and other AI-driven developments. Then, in each chapter, a standard value creation model is applied, mapping a single sector through development, production, distribution, and monetisation. Diverse case studies are analysed from India, Nigeria, South Korea, South Africa, France, the Netherlands, the US, the UK, Denmark, and China, around creative entrepreneurship, revenue models, profit drivers, rights, and emerging AI tools. Questions are provided for each case, whilst chapter summaries cement learning. Applied and technology-focused, this text offers core reading for advanced undergraduate and postgraduates studying Media Management or the relationship between Entertainment Media and Technology. Online resources include chapter-by-chapter PowerPoint slides and an Instructor's Manual with further exercises and case studies.

A Human Algorithm Flynn Coleman, 2019-10-01 A groundbreaking narrative on the urgency of ethically designed AI and a guidebook to reimagining life in the era of intelligent technology. The Age of Intelligent Machines is upon us, and we are at a reflection point. The proliferation of fast-moving technologies, including forms of artificial intelligence akin to a new species, will cause us to confront profound questions about ourselves. The era of human intellectual

superiority is ending and we need to plan for this monumental shift A Human Algorithm How Artificial Intelligence Is Redefining Who We Are examines the immense impact intelligent technology will have on humanity These machines while challenging our personal beliefs and our socioeconomic world order also have the potential to transform our health and well being alleviate poverty and suffering and reveal the mysteries of intelligence and consciousness International human rights attorney Flynn Coleman deftly argues that it is critical that we instill values ethics and morals into our robots algorithms and other forms of AI Equally important we need to develop and implement laws policies and oversight mechanisms to protect us from tech s insidious threats To realize AI s transcendent potential Coleman advocates for inviting a diverse group of voices to participate in designing our intelligent machines and using our moral imagination to ensure that human rights empathy and equity are core principles of emerging technologies Ultimately A Human Algorithm is a clarion call for building a more humane future and moving conscientiously into a new frontier of our own design Coleman argues that the algorithms of machine learning if they are instilled with human ethics and values could bring about a new era of enlightenment San Francisco Chronicle

Il Mondo , 2006-12 **Living with AI: Practical Tools for Beginners** Jeffery Long, 2024-08-23 Living with AI Practical Tools for Beginners Chapter 1 Introduction to AI Artificial Intelligence commonly referred to as AI is a branch of computer science that focuses on creating systems capable of performing tasks that would typically require human intelligence These tasks include problem solving understanding natural language recognizing patterns and making decisions At its core AI aims to develop machines that can mimic cognitive

functions associated with the human mind This technology has evolved over the decades transitioning from theoretical concepts to practical applications that impact our daily lives One of the fundamental building blocks of AI is machine learning which allows computers to learn from data and improve their performance over time without being explicitly programmed This process involves feeding large amounts of data into algorithms which then identify patterns and make predictions based on that information For instance recommendation systems on streaming platforms analyze user behavior to suggest movies or shows that align with individual preferences This capability underscores how AI can enhance user experiences by personalizing interactions
